Perfect Wellness

effegibi®

For over 25 years,
Effegibi has been
designing and
manufacturing saunas
and Turkish baths
with state-of-the-art
technology

Da oltre 25 anni Effegibi progetta e produce saune e bagni turchi con tecnologie all'avanguardia

Effegibi is central to a story that starts with tradition and stretches right into the most innovative future. This is a story of wellbeing, of the ancient traditions of the sauna and the Turkish bath that today's advanced technology and design excellence have clothed in a new guise. This evolution has been made possible by our company that, since 1987, has focused entirely on this sector and we are proud to offer saunas and Turkish baths that are 100% Italian, from design to manufacture.

This philosophy has enabled Effegibi to become the well-deserved leader in our field, winning the trust of our customers the world over. One of our strong points is the excellence of our high-tech solutions, always in the vanguard of progress with long-lasting, energy-saving products of certified quality, requiring very little maintenance.

In addition to our constant quest for high performance and practicality, we at Effegibi are fully aware that feeling good equates to looking good and so we take just as much care over aesthetics. Our saunas and Turkish baths feature clean lines traced by such famous designers, often with generous expanses of glass that transform them into stylish items of furniture. We use only eco-friendly materials, with no plastic and the wood is always top quality from reliable sources that do not cause deforestation or endanger rare trees under threat. Effegibi's extraordinary know-how translates into precise made-to-measure solutions.

All Effegibi products are subject to quality checks in terms of both their aesthetics and functions. The safety of Effegibi products is certified by all the leading international certification bodies to guarantee compliance with the most rigorous current standards.

Effegibi è al centro di una storia che parte dalla tradizione e arriva nel futuro più innovativo. La storia è quella del benessere, di antichi riti come la sauna e il bagno turco che oggi assumono una veste contemporanea grazie a tecnologie avanzate e raffinato design. Dietro a questa evoluzione c'è un'azienda che dal 1987 ha dedicato la sua attività unicamente a questo settore, orgogliosa di offrire una produzione di bagni turchi e saune interamente italiana, dalla progettazione alla produzione.

Con questa filosofia Effegibi è divenuta meritatamente leader nel suo campo, conquistando la fiducia di clienti in tutto il mondo. Un punto di forza è dato dall'eccellenza delle soluzioni tecnologiche, sempre all'avanguardia che garantiscono prodotti di qualità certificata, di lunga durata, con manutenzione ridottissima e risparmio energetico.

Oltre a ricercare elevate prestazioni e funzionalità, Effegibi sa bene che benessere fa rima con "bell'essere", e quindi pone uguale attenzione anche all'estetica. Saune e bagni turchi sono disegnati con linee pulite, tracciate da illustri designer, spesso con grandi aperture vetrate che le trasformano in eleganti oggetti di arredamento. I materiali sono ecocompatibili, non viene utilizzata plastica, i tipi di legno sono di prima scelta e non provengono da deforestazione o da alberi in estinzione. Lo straordinario know-how di Effegibi si traduce in accurate soluzioni su misura.

Ogni articolo Effegibi è sottoposto a verifiche qualitative sia sotto l'aspetto estetico che funzionale. La sicurezza dei prodotti Effegibi è certificata a livello internazionale dai principali marchi di qualità che garantiscono il rispetto delle più severe normative vigenti.

Finnish sauna

Turkish bath

The Finnish sauna

From its Scandinavian beginnings it has conquered the whole world.

The heat in a sauna can reach temperatures up to 100°C but the low humidity (20-30%) transforms this into a pleasant embrace that relaxes the muscles and stimulates bodily purification.

The wood exudes the perfumes of nature, issuing a primitive call to rediscover your inner calm, freeing the mind of all stress.

*First build your sauna
and then build your house.*

This old Finnish saying tells how a simple bath of warm, dry air can become the beating heart of your daily wellbeing.

Sauna finlandese

Un rito che dal Nord Europa si è diffuso in tutto il mondo.

Nella sauna il calore può raggiungere temperature fino ai 100°C, ma grazie alla bassa umidità (20-30%) si trasforma in un piacevole abbraccio che rilassa la muscolatura e favorisce la depurazione dell'organismo. Dal legno si sprigiona il profumo della natura, un primitivo invito a ritrovare la serenità della mente liberando tutte le tensioni.

*Prima costruisci la tua sauna,
in seguito la tua casa.*
Questo antico detto finlandese racconta come un semplice bagno di aria calda e secca possa divenire il centro vitale del proprio benessere quotidiano.

The Turkish bath

Water equals health, including when it is in the form of a cloud of steam enveloping the body.

In far off days this secret was discovered by the Ancient Greeks, Romans and all those Middle Eastern peoples who made the Turkish bath a philosophy of life. In contrast to the sauna, the humidity reaches 100% and the temperature never exceeds 48°C.

Seated on marble or natural stone, enveloped in an impalpable mist, you inhale the warm steam, decongesting the lungs and your sweat carries away all toxins as you distance yourself from the surrounding space, becoming aware of only the feelings of your own body.

L'acqua è salute, anche quando assume la forma di una nuvola di vapore che avvolge il corpo.

L'hanno scoperto in tempi lontani i greci, i romani, i popoli mediorientali che hanno fatto del bagno turco una filosofia di vita. Al contrario della sauna, l'umidità raggiunge il 100% e le temperature non superano i 48 °C. Seduti sul marmo o sulla pietra, avvolti da una nebbia impalpabile, s'inala il tiepido vapore che decongestiona il respiro, ci si libera attraverso il sudore di ogni tossina, ci si estranea dallo spazio circostante e si avverte soltanto la percezione del proprio corpo.

La stufa della sauna di BodyLove è rivestita in ceramica smaltata, con cromie uniche: un materiale di pregio che esalta la morbida bellezza del legno. La fonte di calore, elemento di centrale importanza nella tradizione della sauna finlandese, ritorna ad occupare anche nell'estetica un ruolo di primo piano.

The BodyLove sauna heater is covered in glazed ceramic in unique colour combinations, a luxury material that enhances the soft beauty of the wood. The source of heat, the element of prime importance in the Finnish sauna tradition, has made a comeback with a new aesthetic that once again casts it in a starring role.

→ Version:
BodyLove S.
Finishes: head treated solid wood.

→ BodyLove
Finishes:
natural Canadian hemlock (sauna);
heater with glazed ceramic cover;
Corian® and fluted glass
painted on the back (Hammam).

BodyLove guarantees steam quality that is unrivalled for its density, temperature and hygiene. The Hammam is fitted with the Nuvola Smart Power steam generator, the most high-tech system on the market.

BodyLove garantisce una qualità di vapore senza paragoni per densità, temperatura e igiene: l'hammam è dotato di generatore di vapore Nuvola Smart Power, il massimo della tecnologia disponibile.

→ Version:
BodyLove Sauna+Hammam.
The walls of the Sauna can be supplied
in two different types of wood:
natural Canadian hemlock
and head treated solid wood,
with mirror-finish surfaces on request.

La proposta di materiali di pregio
come ceramica e gres stimola la
percezione dello spazio benessere
come ambiente in continuità
con esterno, piuttosto che come
elemento tecnico aggiunto
e non integrato. BodyLove
prevede la possibilità di una
personalizzazione completa anche
nella scelta dei materiali.

Such luxurious materials
as ceramics and grès porcelain
stimulate perception
of the spa space as an environment
that blends perfectly with
its surroundings, rather than just
an unsightly high-tech add-on.
BodyLove offers the opportunity
for complete personalisation
including the choice of materials.

Functional, stylish, luxurious, a Rodolfo Dordoni and Michele Angelini design that engages all the senses. You can personalise your spa just as you want it.

Whether in a public or private space, BodyLove makes this possible with a modular system that can put together a sauna, Turkish bath, shower and relaxation area, with up-to-the-minute features and tailor-made materials.

Funzionale, elegante, prestigioso: Rodolfo Dordoni e Michele Angelini firmano un progetto che colpisce i sensi.

Personalizza come vuoi la tua Spa, privata o pubblica, grazie a BodyLove, un sistema componibile modulare che permette l'unione di sauna, bagno turco, doccia, area relax, secondo disposizioni sempre nuove e con materiali anche personalizzabili.

→ Version:
BodyLove H.
Finishes:
grès porcelain Auvergne.

→ A panel of Botticino marble contains the taps and the spring and shower controls plus a copper-finish stainless steel bowl to douse yourself with cool water as you take your steam bath.

Quando in un ambiente il contenuto di vapore è superiore alla quantità d'acqua presente nell'epidermide, si forma sulla pelle uno strato di umidità che apporta calore al corpo.

L'azione contemporanea del vapore e del calore controllato aiuta la circolazione sanguigna linfatica sciogliendo le tossine e favorendone l'espulsione.

When the steam content in an environment is greater than the quantity of water in the epidermis, a layer of moisture forms on the skin warming up the body. The combined action of the steam and the controlled heat assists the blood and lymph circulation system, dissolving toxins and favouring their expulsion.

The perfect Turkish bath is created by optimum density steam that stays constant over time, with the temperature above 40°C.

All Effegibi Hammam steam generators have specified steam temperature and quantity to guarantee a truly relaxing, lasting experience.

→ The interior of One H is tiled in carefully-crafted Slimtech® grès porcelain to ensure contact with bare skin creates a warm, natural sensation.

Il perfetto bagno turco si ottiene quando la densità del vapore è ottimale e costante nel tempo, con una temperatura sopra i 40°C.

Gli hammam Effegibi hanno temperatura e quantità di vapore dichiarata per tutti i generatori: questo garantisce un'esperienza di puro relax e una maggiore durata nel tempo.

→ L'interno di One H è rivestito in gres laminato Slimtech® opportunamente lavorato che conferisce nel contatto con il corpo nudo una piacevole sensazione naturale e calda.

The choice of wood

Wood to be used in a sauna must have specific properties of heat absorption and resistance to stress caused by temperature fluctuations. Effegibi carries out all the necessary tests in-house to guarantee the materials are capable of long life and that they meet all the aesthetic needs of a perfect sauna. From Canadian hemlock to the traditional Swedish pine, over ten different types of wood, always of top quality, are selected by Effegibi and subjected to rigorous quality control to ensure the highest possible quality standard.

La scelta del legno

Il legno, per essere utilizzato nella sauna, deve avere precise caratteristiche di assorbimento del calore e di resistenza allo stress causato dagli sbalzi di temperatura. Effegibi effettua internamente tutti i test necessari per garantire che i materiali siano adeguati per durare nel tempo e che rispettino le caratteristiche estetiche necessarie a realizzare saune perfette. Dall'hemlock canadese al tradizionale abete di Svezia, più di dieci tipologie di legno esclusivamente di prima scelta vengono selezionate da Effegibi e sottoposte a rigorosi controlli di qualità per offrire uno standard di altissimo livello qualitativo.

Auki è dotata di un'elegante maniglia a bordo porta, che lascia libere le vetrare e non altera la pulizia del design esterno.

Auki has a stylish edge-mounted door handle that doesn't interrupt the glass panels, preserving the clean lines.

Natural materials

A sauna is subjected to massive thermal stress with an interior temperature that can reach 100°C. This is why the materials it is made of are a determining factor in its quality. Plastic components are never used in Effegibi saunas because at high temperatures they can emit noxious substances. In contrast, natural wood guarantees a healthy environment, is pleasant to the touch and is not altered over time.

Materie naturali

Le saune subiscono enormi sollecitazioni termiche, con una temperatura interna che può arrivare fino a 100 °C. Per questo i materiali che la compongono sono un fattore determinante di qualità.

Nelle saune Effegibi non vengono mai utilizzati componenti plastici, poiché a temperature elevate potrebbero rilasciare sostanze nocive. Al contrario, i legni naturali garantiscono un ambiente sano, piacevole al tatto, che resta a lungo inalterato.

Biosauna

La Biosauna è una sauna con livelli di temperatura contenuti tra i 50 e i 60°C e un'umidità di circa 60-70%. Grazie al vaporizzatore integrato, impostando la temperatura preferita, la stufa Bio creerà l'equilibrio perfetto fra calore ed umidità. Il sistema combinato Effegibi consente la scelta tra Biosauna, un percorso a metà strada fra la sauna finlandese e la natura mediterranea del bagno di vapore, o sauna tradizionale, caratterizzata da temperature fino a 100°C con bassa umidità. Il sistema combinato può essere applicata a tutte le saune di Effegibi.

The Bio-sauna is a sauna whose temperature ranges from 50 to 60°C with humidity between 60-70%. The built-in vaporiser allows you to set your preferred temperature and the Bio heater creates the perfect balance between heat and humidity. The combined Effegibi system allows you to choose between a Bio-sauna, a halfway house between the Finnish sauna and the Mediterranean nature of the steam bath, or a traditional sauna with low humidity and a temperature of up to 100°C.

This combined system can be installed in all Effegibi saunas.

La ciotola per bagnarsi con acqua fresca durante il bagno turco evoca le origini dell'hammam: la sua funzione è legata all'utilizzo dell'acqua nella pratica di questo antichissimo rito purificatore.

The bowl for dousing yourself with cool water during your Turkish bath evokes the historic origins of the Hammam in which water was an important feature of this ancient purification ritual.

Steam generators

The Effegibi experience guarantees the essential elements for a quality Hammam

1 _____

Generating the right amount of steam

2 _____

Maintaining the right temperature

3 _____

Dealing with lime scale

4 _____

Controlling energy consumption

Generatori di vapore

L'esperienza Effegibi garantisce gli elementi basilari per un hammam di qualità

1 _____

Corretta quantità di vapore prodotto

2 _____

Mantenimento della temperatura

3 _____

Gestione del calcare

4 _____

Controllo del consumo energetico

Quality of steam

1 _____ 2 _____

A perfect Hammam is achieved when the steam makes it possible to reach a temperature above 40°C. In Effegibi products the temperature can be set on a scale from 42 to 48°C. The smart steam management system, the fruit of many years of R&D, ensures even heat distribution inside the Turkish bath.

Lime scale and hygiene

3 _____

Exclusive Effegibi technology has produced a unique system without mechanical filters on the generators and no need for frequent maintenance. All the boilers are stainless steel and a sophisticated system fills and empties the boiler with clean cold water every time it is used. This notably reduces the need for cleaning and maintenance, as well as ensuring the interior environment is perfectly hygienic.

Optimised management of energy consumption

4 _____

Each Effegibi steam generator has an Energy Saver function. The maximum power of the generator is used to bring the water to boiling point and reach the set temperature. While it is functioning the energy input is reduced to a half or a third, depending on the model, while keeping the steam flow constant.

Qualità del vapore

1 _____ 2 _____

Un perfetto hammam si ottiene quando il vapore consente di raggiungere una temperatura superiore ai 40°C. Nei prodotti Effegibi la temperatura è programmabile in una scala che va dai 42 ai 48°C. La sapiente gestione del vapore, frutto di anni di ricerca, ottimizza l'omogeneità del calore all'interno del bagno turco.

Calcare e igiene

3 _____

La tecnologia esclusiva Effegibi, unica al mondo, consente di evitare filtri meccanici sul generatore e manutenzioni frequenti. Grazie a sistemi sofisticati, la caldaia (rigorosamente in acciaio inox) viene caricata e scaricata con acqua fredda e pulita a ogni utilizzo. Questo riduce notevolmente la necessità di interventi di pulizia e manutenzione, oltre a garantire una perfetta igiene all'interno dell'ambiente.

Gestione ottimizzata del consumo energetico

4 _____

Ogni generatore di vapore Effegibi è dotato di una funzione Energy Saver. La potenza massima del generatore viene sfruttata per portare in ebollizione l'acqua e raggiungere la temperatura impostata. Durante il funzionamento l'assorbimento viene ridotto alla metà o anche a un terzo, a seconda del modello di prodotto, pur mantenendo costante il getto di vapore.

Doors and glass panels

Touch&Steam can be fitted to any environment set up to house a Hammam, from a home shower to larger spaces and also made-to-measure designs. It is essential for such an area to be fitted with doors and glass panels specifically designed for a Hammam, capable of insulating it from the outer environment while maintaining a controlled air-flow.

Porte e vetrate

Touch&Steam può essere applicato in ogni ambiente predisposto per ospitare un hammam: dalla doccia di casa a spazi più ampi, anche progettati su misura. È fondamentale che a queste aree siano applicate porte e vetrate specifiche per hammam, in grado di isolare dall'esterno mantenendo un passaggio calibrato dell'aria.

With Touch&Steam you can enjoy the benefits of colour therapy. There is a choice of five fixed colours (red, yellow, green, blue, aquamarine) and 4 programs providing tonal variations within one colour range (dawn, sunset, sea, forest).

Con Touch&Steam si apprezzano i benefici della cromoterapia. Si può scegliere tra 5 colori in modalità fissa (rosso, giallo, verde, blu, acquamarina) e 4 programmi di variazioni di una gamma cromatica (alba, tramonto, mare, bosco).

Hotel Rosa Alpina
Châlet Zeno
San Cassiano - Italy

The secret to creating your dream Turkish bath at home is perfect door insulation to ensure that the steam stays inside while the right amount of air flows in from outside. Effegibi has designed a range of professional-standard doors that can be fitted to your shower cubicle to keep steam density constant and reduce consumption.

Il segreto per realizzare il bagno turco ideale a casa propria è l'utilizzo di una perfetta coibentazione della porta, in modo che il vapore sia isolato all'interno, mentre viene garantito il giusto ingresso di aria dall'esterno.

Effegibi ha studiato una serie di porte professionali da applicare alla cabina doccia, per mantenere costante la densità del vapore e ridurre i consumi.

Aquasteam

STEAM GENERATOR

Una lastra di vetro curvato con comandi digitali, una fonte e una ciotola rendono Aquasteam un generatore di vapore intuitivo nell'uso e perfettamente abbinabile a qualsiasi rivestimento.

A curved glass panel with digital controls, a spring and a bowl make Aquasteam an intuitive steam generator to use that blends perfectly with any décor.

→ Generatore di vapore con fonte, ciotola, aromaterapia
→ Steam generator with spring, bowl and aroma therapy

→ Tecnologia Effegibi per la generazione del vapore: igiene, controllo del calcare e massima qualità del vapore
→ Effegibi steam generation technology gives you maximum control over hygiene, lime-scale build-up and steam quality

→ Manutenzione ridotta e lunga durata grazie al sistema automatico di lavaggio della caldaia
→ Low maintenance and a long life thanks to the automatic boiler-cleaning system

→ Design molto compatto costituito da una lastra di vetro curvato serigrafato, spessore visibile: 3,7 cm
→ Extremely compact design featuring a curved panel of silk-screen-printed glass, visible thickness 3.7cm

→ Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura
→ Touch-screen control panel with backlit icons and temperature indicator

→ Predisposizione per collegamento a lampada per cromoterapia
→ Set up for connection to a colour therapy lamp

→ Abbinabile alle porte e vetrate della gamma Effegibi, specificamente progettate per hammam
→ Can be teamed with doors and glass panels from the Effegibi range specifically designed for Hammams

How to take a Turkish bath

Il grande bisogno di relax e tranquillità tipico della nostra civiltà si scioglie nel caldo tepore dell'hammam.

Non esiste un momento giusto per farlo, la scelta è molto personale. È preferibile, però, seguire alcuni suggerimenti. Prima di entrare è meglio bere un bicchiere d'acqua o una tisana, per evitare di disidratarsi. Poi, inumidire la pelle con una doccia tiepida per prepararla al bagno di vapore.

Nel bagno turco si può stare nudi o coperti da un asciugamano in fibra naturale. Il periodo di permanenza varia da 10 a 15 minuti, ma occorre ascoltare il proprio corpo e fermarsi fino a quando non si desidera uscire.

That great yearning for peace and relaxation so typical of our society dissolves in the warmth of the Hammam.

There is no one right time to take a Turkish bath, this is an entirely personal choice, but here is some useful advice.

Before entering it is a good idea to drink a glass of water or herbal tea to avoid becoming dehydrated. Then wet your skin with a warm shower to prepare it for the steam bath.

You can enjoy the Turkish bath in the nude or covered with natural fibre towel. You can stay in it for from 10 to 15 minutes but you should listen to your body and stay there until it tells you it's time to leave.

All'interno, oltre al vapore, si può godere anche dell'aromaterapia, con oli essenziali scelti per risvegliare, rinfrescare, stimolare o rilassare. Anche i colori della cromoterapia agiscono beneficiamente sul corpo e la mente.

Si conclude con una doccia fresca e ci si sdrai per qualche minuto di relax.

In addition to the steam you can also enjoy some aromatherapy with the essential oils of your choice to wake you up, refresh or stimulate yourself or relax.

You can also enjoy the physical and mental benefits of colour therapy. Finish your session with a cool shower and lie down and relax for a few minutes.

Steambox

Steambox è il geniale sistema di costruzione del box hammam che consente un velocissimo assemblaggio delle pareti ed è predisposto per un isolamento perfetto dall'esterno, per il mantenimento ottimale di temperatura e qualità del vapore.

Steambox è un kit comprensivo di pannelli di polistirene di vario spessore (10 cm e 5 cm) con rete e rasatura cementizia, piatto doccia con scarico integrato e tetto con sezione inclinata. Sono inclusi tutti i materiali necessari all'incollaggio e all'impermeabilizzazione. Il box è rivestibile con piastrelle o mosaico a scelta del cliente, è disponibile in varie configurazioni e consente la facile applicazione dei generatori di vapore e delle porte Spazio Frameless, studiate appositamente.

LEARN MORE
ABOUT STEAMBOX:

Steambox is an ingenious construction system for the Hammam cubicle with ultra-quick assembly of the walls and designed for perfect insulation from the outside environment, for optimum temperature control and steam quality. Steambox is a kit including polystyrene panels in two thicknesses, 10cm and 5cm, mesh-reinforced and mortar-finished, complete with shower tray with pre-fitted drain and roof with a sloping section. The kit contains all the necessary adhesives and waterproofing materials. The cubicle can be covered with the tiles or mosaic of the customer's choice and it is available in various formats, making it simple to install the steam generators and specially designed Spazio Frameless doors.

ESS

EFFEGIBI SOUND SYSTEM

Collegando un tablet o uno smartphone alla docking station Effegibi è possibile ascoltare la musica preferita all'interno della sauna, dell'hammam o nell'ambiente in cui si trova. La diffusione all'interno della sauna o dell'hammam avviene tramite un altoparlante posizionato all'interno della cabina.

La docking station, dotata di due casse stereo, si collega automaticamente all'altoparlante interno senza dover installare software o predisporre collegamenti specifici.

The Effegibi docking station can be connected to any tablet or smartphone so you can listen to your favourite music both inside and outside the sauna or the Hammam.

The sound inside the sauna or the Hammam is transmitted by a loudspeaker placed inside the cubicle.

The docking station, which has two stereo speakers, connects automatically to the internal speaker with no need to install any software or make special connections.

ECC

EFFEGIBI COMFORT CONTROL

Sistema che consente di gestire a distanza il bagno turco o la sauna, scaricando l'apposita App Effegibi Experience sul proprio Tablet o Smartphone. È possibile personalizzare la propria esperienza comodamente da altri ambienti della casa ed eseguire funzioni quali impostazione dell'ora di accensione, della temperatura e selezione della luce preferita.

Inoltre la copertura Wi-Fi nell'ambiente in cui sono inseriti il bagno turco o la sauna, permette una programmazione remota da qualsiasi luogo (ufficio-auto ecc.).

Infine l'App Effegibi Experience permette di avere informazioni utili sull'utilizzo del prodotto: da come utilizzarli al meglio a quali sono i suoi benefici fino alla storia di questo rito antico.

This system can control remotely the sauna or the Turkish bath. To enable it, just download the app Effegibi Experience to your Tablet or Smartphone. This makes it possible to personalise your own experience conveniently from other places in your home and pre-set such functions as switch-on time, temperature and your preferred light selection.

What's more, the Wi-Fi cover in the sauna or hammam area enables you to program it remotely from almost any other location, such as your office or car.

Last but not least, the Effegibi Experience app provides you with useful information about the product, such as how to get the best out of your sauna or your hammam and its health benefits, as well as historical notes on this centuries-old tradition.

Available on the
App Store

Doors and glass panels

PORTE E VETRINE

Le speciali porte Effegibi per hammam sono progettate per ottenere una tenuta perfetta alla fuoriuscita del vapore, garantendo il giusto ricircolo d'aria.

L'acciaio inox, l'alluminio e il vetro temperato di 8 mm di spessore rendono ogni modello molto durevole e facilmente abbinabile allo stile di ogni arredamento.

Grazie alle porte Effegibi, anche la semplice doccia di casa può essere trasformata in un perfetto bagno turco.

The special doors created by Effegibi for Hammams are designed to ensure a perfect seal against the escape of steam thus ensuring proper air circulation. Stainless steel and 8mm-thick toughened glass make each model tough and long-lasting and easily adaptable to any furnishing style. Effegibi's special doors also enable any ordinary home shower to be transformed into the perfect Turkish bath.

ESTERNO, INTERNO: TECK - TULPIER;
ARREDI: ASPEN NATURALE - ASPEN
TERMOTRATTATO;
VETRI TEMPERATI CHIARI 10 MM.

CARATTERISTICHE/COMPONENTI
ILLUMINAZIONE A PARETE CON LUCE
BIANCA A LED;
STUFA CON PIETRE;
PANNELLO DI CONTROLLO, FINITURA

ACCIAIO SPAZZOLATO;
FUNZIONE ENERGY SAVER AUTOMATICA;
IMPIANTO ELETTRICO CANALIZZATO;
PANCHE;

GRIGLIA PROTEZIONE STUFA;
MASTELLINO E MESTOLO IN LEGNO;
CLESSIDRA.

OPTIONAL
BIOSAUNA;
CROMOTERAPIA A LED;
MOOD LIGHT (LED SOTTOPANCA);
ECC-EFFEGIBI COMFORT CONTROL;
ESS-EFFEGIBI SOUND SYSTEM;
PORTASCIUGAMANI E MENSOLA.

DIMENSIONS AND ABSORBED POWER

SAUNA 8,0 KW MAX
BIOSAUNA 9,0 KW MAX

MATERIALS
OUTSIDE, INSIDE: TECK - TULPIER;
FITTINGS: NATURAL ASPEN WOOD -
HEAT-TREATED ASPEN WOOD;
10 MM CLEAR TEMPERED GLASS.

FEATURES/COMPONENTS
WALL LIGHTING WITH LED WHITE LIGHT;
HEATER WITH STONES;
CONTROL PANEL WITH BRUSHED STEEL
FINISH;
AUTOMATIC ENERGY SAVER FUNCTION;

ELECTRICAL SYSTEM WITH PROTECTED
CABLE DUCTS;
BENCHES;
PROTECTIVE GRILLE FOR HEATER;
WOODEN BUCKET AND LADLE;
HOURGLASS.

OPTIONAL
BIOSAUNA;
COLOUR THERAPY LED RGB;
MOOD LIGHT (LED UNDER THE BENCH);
ECC-EFFEGIBI COMFORT CONTROL;
ESS-EFFEGIBI SOUND SYSTEM;
TOWEL HOLDER AND SHELF.

Depuis plus de vingt-cinq ans, Effegibi conçoit et produit des saunas et des bains turcs avec des technologies d'avant-garde.

Effegibi est au centre d'une histoire qui a ses origines dans la tradition et qui arrive dans un avenir plus innovant. L'histoire est celle du bien-être, de rites anciens comme le sauna et le bain turc qui, aujourd'hui, revêt un style contemporain grâce à des technologies avancées et un design raffiné. Derrière cette évolution, il y a une entreprise qui, depuis 1987, a consacré son activité uniquement à ce secteur, fière d'offrir une production de bains turcs et de saunas entièrement italiennes, de la conception à la production. Avec cette philosophie, Effegibi est devenue à juste titre leader dans son secteur, en gagnant la confiance de ses clients dans le monde entier. Un atout est donné de l'excellence des solutions technologiques, toujours à l'avant-garde qui garantissent des produits de qualité certifiée, de longue durée, avec un entretien extrêmement réduit et assurant une économie d'énergie. En plus de rechercher des fonctionnalités et des performances élevées, Effegibi sait parfaitement que bien-être rime avec « bel être » et accorde de fait la même attention à l'esthétique. Les saunas et les bains turcs sont dessinés avec des lignes nettes, tracées par des designers illustres, souvent avec de grandes ouvertures vitrées qu'ils les transforment en des objets d'ameublement élégants. Les matériaux sont écocompatibles, aucune matière plastique n'est utilisée, les types de bois sont de premier choix et ne proviennent pas de la déforestation ni d'arbres en voie de disparition. Le savoir-faire extraordinaire d'Effegibi se traduit en des solutions précises sur mesure.

Bain turc

L'eau est synonyme de santé, même lorsqu'elle prend la forme d'un nuage de vapeur qui enveloppe le corps. Le bain turc fut découvert jadis par les grecs, les romains et les peuples du Moyen-Orient qui en ont fait une philosophie de vie. Contrairement au sauna, l'humidité atteint 100 % et les températures ne dépassent pas 48 °C. Assis sur le marbre ou sur la pierre, enveloppés par un brouillard impalpable, on inhale la vapeur tiède qui décongestionne la respiration, on se libère de toutes les toxines à travers la transpiration, on s'isole de l'espace environnant et on perçoit uniquement notre corps.

BODYLOVE → 21

Système modulaire qui unit sauna, bain turc, douche : un véritable spa personnel, conçu pour être versatile et élégant.

Dans la version sauna + hammam, BodyLove permet diverses possibilités d'orientation et positionnement des portes d'accès aux deux espaces.

Le poêle du sauna de BodyLove est revêtu en céramique émaillée, avec des couleurs uniques : un matériau précieux qui exalte la douce beauté du bois. La source de chaleur, élément extrêmement important dans la tradition du sauna finlandais, occupe à nouveau également dans l'esthétique un rôle de premier plan.

→ 10

Le sauna et le bain turc ont des bénéfices similaires mais des origines et des modes d'emploi différents

Sauna finlandais

Un rite qui s'est répandu depuis le nord de l'Europe dans le monde entier. Dans le sauna, la chaleur peut atteindre des températures jusqu'à 100 °C, mais grâce à la basse humidité (20-30 %), elle se transforme en un agréable enlacement qui détend la musculature et favorise l'épuration de l'organisme. Le bois libère le parfum de la nature, une invitation primitive à retrouver la sérénité de l'esprit en relâchant toutes les tensions. Construisez d'abord votre sauna puis votre maison. Ce vieux

dicton finlandais raconte comme un simple bain d'air chaud et sec puisse devenir le centre vital du bien-être quotidien.

Bain turc

L'eau est synonyme de santé, même lorsqu'elle prend la forme d'un nuage de vapeur qui enveloppe le corps. Le bain turc fut découvert jadis par les grecs, les romains et les peuples du Moyen-Orient qui en ont fait une philosophie de vie. Contrairement au sauna, l'humidité atteint 100 % et les températures ne dépassent pas 48 °C. Assis sur le marbre ou sur la pierre, enveloppés par un brouillard impalpable, on inhale la vapeur tiède qui décongestionne la respiration, on se libère de toutes les toxines à travers la transpiration, on s'isole de l'espace environnant et on perçoit uniquement notre corps.

LOGICA

→ 37

Sauna et bain turc en une solution unique, reliés par un espace douche élégant.

Logica contient toutes les fonctions d'un centre de bien-être complet, en maintenant un parfait équilibre entre fonctionnalité, esthétique et technologie.

Caractéristiques :

- Système intégré avec sauna, bain turc et douche
- Technologie Aquasteam pour la production de vapeur, pour un contrôle total de la qualité
- Douche dotée de pomme de douche anticalcaire et mitigeur à cartouche progressive et inverseur

- Matériaux de qualité exceptionnelle : bois Hemlock canadien, revêtements en grès laminé Slimtech® de 3,5 mm, portes en verre trempé de 8 mm

- ESS - Effegibi Sound System pour le contrôle de la musique directement depuis votre dispositif (en option)

- Disponible en sept finitions standard, ou avec des couleurs personnalisées.

- Matériaux de qualité exceptionnelle : bois Hemlock canadien, revêtements en grès laminé Slimtech® de 3,5 mm, portes en verre trempé de 8 mm.

- ESS - Effegibi Sound System pour le contrôle de la musique directement depuis votre dispositif (en option)

- Logica SH est un espace de bien-être chez vous, versatile grâce aux trois variantes chromatiques

Les parois sont proposées en deux diverses essences de bois : Hemlock naturel et bois massif thermo-traité, avec la possibilité d'insérer sur demande des surfaces en miroir.

Caractéristiques :

- Système intégré avec sauna et bain turc.

- Aquasteam est installé pour la production de vapeur, avec fonction Energy Saver et système automatique de lavage de la chaudière.

- Disponible en sept finitions standard, ou avec des couleurs personnalisées.

- Matériaux de qualité exceptionnelle : bois Hemlock canadien, revêtements en grès laminé Slimtech® de 3,5 mm, portes en verre trempé de 8 mm.

- ESS - Effegibi Sound System pour le contrôle de la musique directement depuis votre dispositif (en option)

- Logica SH est un espace de bien-être chez vous, versatile grâce aux trois variantes chromatiques

design intégré dans votre maison.

Caractéristiques :

- Système intégré avec sauna et bain turc.

- Aquasteam est installé pour la production de vapeur, avec fonction Energy Saver et système automatique de lavage de la chaudière.

- Disponible en sept finitions standard, ou avec des couleurs personnalisées.

BIOSAUNA	→ 170
Le Bio-sauna est un sauna avec des niveaux de température contenus entre 50 et 60 °C et une humidité d'environ 60-70 %. Grâce au vaporisateur intégré, en programmant la température souhaitée, le poêle Bio créera l'équilibre parfait entre chaleur et humidité. Le système combiné Effegibi permet de choisir entre Bio-sauna, un parcours à mi-chemin entre le sauna finlandais et la nature méditerranéenne du bain de vapeur, ou le sauna traditionnel, caractérisé par des températures allant jusqu'à 100 °C avec basse humidité. Le système combiné peut être appliqué à tous les saunas d'Effegibi.	

TOPKAPI	→ 175
----------------	-------

La véritable essence des anciens hammams est représentée par Topkapi : des revêtements en marbre Carrare, Marquina ou Botticino et un standard qualitatif inégalé dans la production de vapeur.	
---	--

Caractéristiques :	
- Bain turc équipé de douche, fontaine, banquettes et chromothérapie	
- Matériaux de très haut niveau : marbre en trois variantes, acier, verre trempé, bois teck de Birmanie naturel	
- Vitrages internes de fond disponibles en double finition : miroir et blanc	
- Vitres externes disponibles entièrement transparents ou avec finition effet pluie semi mate	
- Topkapi est équipé d'une fontaine revêtue en marbre de premier choix, avec bol en acier finition cuivrée	
- Topkapi est doté du ESS - Effegibi Sound System, pour le contrôle de la musique directement depuis votre dispositif	
- Tableau tactile intuitif et rétro-illuminé pour gérer la vapeur, les températures, la lumière et la chromothérapie	
- Générateur de vapeur intégré dans la colonne qui répond aux standards de qualité uniques	

Le marbre est protagoniste dans Topkapi, tout comme dans les hammams historiques les plus somptueux de la Turquie. Ce matériau extraordinaire, extrêmement durable et résistant, confère une sensation spéciale au toucher qui amplifie le plaisir du bain turc.	
--	--

Portes et cloisons vitrées :	
Touch&Steam peut être appliquée dans chaque pièce prévue pour accueillir un hammam : de la douche chez vous à des espaces plus amples,	

H	→ 185
Séries de hammams avec performances professionnelles, équipés de douche et chromothérapie, idéaux pour compléter votre salle de bains avec une zone dédiée au bien-être.	

Caractéristiques :	
- Hamman équipé de douche et chromothérapie	
- Technologie Aquasteam pour la production de vapeur : le maximum du contrôle sur la qualité de votre vapeur	
- Intérieur et mobilier en grès laminé de 3,5 mm, portes en verre trempé de 8 mm	
- Disponible en sept variantes chromatiques	
- Espace douche pratique et fonctionnel, avec mitigeur thermostatique, douche à main et pomme de douche au plafond 42x42 cm avec fonctions pluie et nébulisation	

TRANSFORM YOUR SHOWER INTO A HAMMAM → 216

Transformez votre douche en hammam
Le secret pour réaliser le bain turc idéal chez vous est l'application d'une isolation parfaite de la porte, de sorte que la vapeur soit isolée à l'intérieur, tout en garantissant la bonne entrée d'air depuis l'extérieur. Effegibi a étudié une série de portes professionnelles à appliquer à la cabine douche, pour maintenir constante la densité de la vapeur et réduire les consommations.

TOUCH&STEAM	→ 205
Peut être inséré dans chaque douche ou hammam, Touch&Steam est un générateur de vapeur professionnel au design élégant et léger. Le maximum de la technologie dans la production de vapeur.	

Caractéristiques :	
- Générateur de vapeur doté de chromothérapie et aromathérapie	
- Technologie Effegibi pour la production de vapeur : le maximum du contrôle sur la qualité, densité et hygiène	

Caractéristiques :	
- Système de ventilation de l'air qui minimise la stratification des températures à l'intérieur de la cabine	
- Entretien réduit grâce au système automatique de lavage de la chaudière qui minimise l'accumulation de calcaire	

Caractéristiques :	
- Design élégant et compact	
- Tableau tactile avec icônes rétro-illuminées et indicateur du niveau de température	

Caractéristiques :	
- ESS - Effegibi Sound System, pour le contrôle de la musique directement depuis votre dispositif (en option)	
- Chaud-douche : système de chauffage par ventilation forcée avec fonction de préchauffage de la pièce	

Caractéristiques :	
- Peut être assorti aux portes et cloisons vitrées de la gamme Effegibi, spécialement conçues pour des hammams	
Portes et cloisons vitrées :	

Touch&Steam peut être appliquée dans chaque pièce prévue pour accueillir un hammam : de la douche chez vous à des espaces plus amples,	
--	--

EASYTEAM	→ 227
Générateur de vapeur élégant et compact, Easysteam conjugue la simplicité d'installation, la technologie élevée et la simplicité d'utilisation.	

Caractéristiques :	
- Générateur de vapeur avec aromathérapie	
- Technologie Effegibi pour la production de vapeur : hygiène, contrôle du calcaire et qualité maximale de la vapeur	

Caractéristiques :	
- Entretien réduit et durée accrue grâce au système automatique de lavage de la chaudière	
- Design très compact composé d'un panneau vitré incurvé sérigraphié, épaisseur visible : 3,7 cm	
- Tableau de commande tactile avec icônes rétro-illuminées et indicateur du niveau de température	
- Pré-installation pour raccordement de la lampe pour chromothérapie	

Caractéristiques :	
- Peut être assorti aux portes et cloisons vitrées de la gamme Effegibi, spécialement conçues pour des hammams	
Transformez votre douche en hammam → 216	
Caractéristiques :	
- Générateur de vapeur avec aromathérapie

NUVOLA SMART POWER	→ 235
Générateur de vapeur à haute puissance, à placer à l'extérieur de l'espace hammam : la technologie la plus sophistiquée existante et la netteté formelle font de Nuvola Smart Power un produit exceptionnel	

Caractéristiques :	
- Générateur de vapeur avec fontaine, bol, aromathérapie	
- Technologie Effegibi pour la production de vapeur : hygiène, contrôle du calcaire et qualité maximale de la vapeur	

Caractéristiques :	

</tbl_r

<p>Seit über 25 Jahren entwickelt und fertigt Effegibi Saunen und türkische Dampfbäder mit modernster Technologie.</p> <p>Effegibi steht im Mittelpunkt einer Geschichte, die bei der Tradition beginnt und bis in die hoch innovative Zukunft reicht. Die Geschichte ist die des Wohlbefindens. Sie berichtet von antiken Riten, wie der Sauna und dem türkischen Dampfbad, die heute dank fortschrittlicher Technologie und edlem Design einen modernen Look annehmen. Hinter dieser Entwicklung steht ein Unternehmen, das sich seit 1987 allein dieser Branche widmet und stolz eine gänzlich italienische Produktion von türkischen Dampfbädern und Saunen – von der Planung bis zur Fertigung – anbietet. Aufbauend auf dieser Philosophie wurde Effegibi verdienterweise zum Leader in diesem Bereich und gewann das Vertrauen der Kunden aus aller Welt. Eine unserer Stärken ist die Vortrefflichkeit der technologischen Lösungen stets von höchstem Niveau, die langlebige und zertifizierte Qualitätsprodukte mit einem reduzierten Wartungsaufwand und Energieeinsparungen garantieren. Neben dem Streben nach hohen Leistungen und Funktionalität weiß Effegibi um die Verwandtschaft zwischen Wohlbefinden und schönem Design, dem es folglich die gleiche Aufmerksamkeit widmet. Die Saunen und türkischen Dampfbäder überzeugen durch das klarlinige Design und die oft weiträumigen Verglasungen, die sie in elegante Einrichtungslemente verwandeln. Die Materialien sind umweltfreundlich – es werden keine Kunststoffe verwendet – und die Hölzer sind erster Wahl und stammen nicht aus der Abholzung oder von aussterbenden Baumarten. Das einzigartige Know-how von Effegibi kommt in akkuraten Lösungen nach Maß zum Ausdruck.</p>	<p>→ 4</p> <p>Türkisches Dampfbad</p> <p>Wasser ist Gesundheit, auch wenn es die Form einer Dampfwolke annimmt, die den Körper umhüllt. Entdeckt wurde diese Kenntnis vor langer Zeit von den Griechen, den Römer, den Völkern des Nahen Ostens, die das türkische Dampfbad zu einer Lebensphilosophie machten. Im Gegensatz zur Sauna herrschen im Dampfbad Luftfeuchtigkeiten bis 100% und Temperaturen unter 48 °C. Auf Marmor oder Stein sitzend und in einem sehr feinen Nebel gehüllt atmet man warmen Dampf ein, der den Atem beruhigt. Zugleich befreit sich der Körper durch Schwitzen von allen Giftstoffen und der Geist vom Umfeld – was bleibt, ist die reine Wahrnehmung des eigenen Körpers.</p>	<p>alle Spannungen zu lösen. Bau zuerst deine Sauna, dann dein Haus. Dieses alte finnische Sprichwort bezeugt, wie ein einfaches Bad in warmer und trockener Luft zum vitalen Kern des täglichen Wohlbefindens werden kann.</p>	<p>Eine Platte aus Botticino-Marmor beinhaltet die Armaturengruppe (Ausgabe und Bedienelemente Quelle + Dusche) und eine Schale aus Stahl mit Kupfer-Effekt, um sich während des Dampfbads mit kühltem Wasser zu erfrischen.</p>	<p>LOGICA SH → 54</p> <p>Die Wände werden in zwei Holzausführungen angeboten: naturbelassenes Hemlock-Holz und thermisch behandeltes Massivholz, mit der Möglichkeit, auf Anfrage Spiegelflächen einzufügen.</p> <p>Wie alle Effegibi-Produkte bietet auch BodyLove viele individuelle Gestaltungsmöglichkeiten hinsichtlich der Wahl und der Kombination der Materialien und ermöglicht damit die Realisierung eines wahrhaft maßgeschneiderten Wellnessbereichs.</p>	<p>einfache und intuitive Bedienung entwickelte Technologie. Nichts stört Ihre Entspannung.</p>
<p>BODYLOVE → 21</p> <p>Modulares System, das Sauna, türkisches Dampfbad und Dusche miteinander vereint: ein wahres eigenes SPA, vielseitig und elegant.</p>	<p>LOGICA → 37</p> <p>Sauna und türkisches Dampfbad in einer einzigen Lösung und verbunden über einen eleganten Duschbereich. Logica bietet alle Funktionen eines kompletten Wellnesscenters und bewahrt dabei Funktionalität, Design und Technologie in einem perfekten Gleichgewicht.</p>	<p>BODILYOVE → 21</p> <p>In der Ausführung Sauna + Hamam bietet BodyLove verschiedene Ausrichtungs- und Positionierungsmöglichkeiten der Zugangstüren der beiden Räume.</p>	<p>LOGICA → 37</p> <p>Modulares System, das Sauna, türkisches Dampfbad und Dusche miteinander vereint: ein wahres eigenes SPA, vielseitig und elegant.</p>	<p>BESCHREIBUNG:</p> <ul style="list-style-type: none"> - Integriertes System mit Sauna, türkischem Dampfbad und Dusche - Dampferzeugung mit Aquasteam-Technologie für eine absolute Qualitätskontrolle - Dusche mit Deckenbrause mit Anti-Kalk-System und Mischer mit Einhebelregulierung und Umsteller - Materialien von außergewöhnlicher Qualität: kanadisches Hemlock-Holz; Verfließungen aus laminiertem Feinsteinzeug Slimtech®, 3,5 mm; Türen aus gehärtetem Glas, 8 mm - ESS - Effegibi Sound System für die direkte Ansteuerung der Musik über das eigene Mobilgerät (optional) - Erhältlich in sieben 	<p>BESCHREIBUNG:</p> <ul style="list-style-type: none"> - Integriertes System mit Sauna und türkischem Dampfbad - Für die Dampferzeugung sorgt Aquasteam mit der Funktion Energy Saver und automatischem Kesselreinigungssystem - Erhältlich in sieben
<p>→ 10</p> <p>Sauna und türkisches Dampfbad bieten ähnliche Wohltaten, haben aber andere Ursprünge und Benutzungsmethoden</p>	<p>Finnische Sauna</p> <p>Ein Ritual, das von Nordeuropa aus, die ganze Welt erobert hat. In der Sauna kann die Wärme Temperaturen bis zu 100 °C erreichen, aber aufgrund der geringen Luftfeuchte (20-30%) verwandelt sich diese in eine angenehme Urmarmung, welche die Muskeln entspannt und die Reinigung des Organismus fördert. Aus dem Holz strömt der Duft der Natur – eine primitive Einladung, die geistige Ruhe wiederzufinden und</p>	<p>→ 10</p> <p>Sauna und türkisches Dampfbad bieten ähnliche Wohltaten, haben aber andere Ursprünge und Benutzungsmethoden</p>	<p>Finnische Sauna</p> <p>Ein Ritual, das von Nordeuropa aus, die ganze Welt erobert hat. weil diese bei hohen Temperaturen schädliche Stoffe freisetzen könnten. Im Gegensatz dazu gewährleistet natürliches Holz ein gesundes Ambiente, das sich schön anfühlt und mit der Zeit nicht verändert.

Die Wahl des Holzes

Das für eine Sauna bestimmte Holz muss präzise Eigenschaften bezüglich der Wärmeaufnahme und der Beständigkeit gegenüber Stress durch Temperaturänderungen aufweisen. Effegibi führt hausintern alle notwendigen Prüfungen durch, um zu garantieren, dass das Material für eine lange Lebensdauer geeignet ist und die ästhetischen Merkmale für die Fertigung von perfekten Saunen erfüllt. Vom kanadischen Hemlock-Holz bis zum traditionellen Fichtenholz aus Schweden – mehr als zehn exklusive Holzarten erster Wahl werden von Effegibi ausgewählt und strengen Qualitätskontrollen unterzogen, um einen Standard von höchster Qualität zu bieten.

BIOSAUNA → 170

Die Biosauna ist eine Sauna mit niedrigeren Temperaturen zwischen 50 und 60°C und einer Feuchtigkeit von etwa 60-70%. Dank des integrierten Verdampfers und durch das Einstellen der bevorzugten Temperatur sorgt der Bio-Ofen für eine perfekte Balance zwischen Wärme und Feuchtigkeit. Dank des Effegibi-Kombisystems hat man die Wahl zwischen Biosauna, einem Mittelweg aus der finnischen Sauna und der mediterranen Natur des Dampfbades, und traditioneller Sauna mit Temperaturen bis zu 100°C und niedriger Luftfeuchtigkeit. Das Kombisystem kann für alle Saunen von Effegibi eingesetzt werden.

TOPKAPI → 175

Topkapi verkörpert die echte Essenz der antiken Hamams: Auskleidungen aus Marmor – Carrara, Marquina oder Botticino – und ein Qualitätsstandard in der Dampferzeugung ohnegleichen.

Beschreibung:
- Türkisches Dampfbad mit Dusche, Quelle, Bänke und Farblichttherapie
- Materialien von höchstem Niveau: Marmor in drei Varianten, Stahl, gehärtetes Glas, natürliches Teak-Holz aus Myanmar
- Innenverglasung an der Rückwand in zwei Ausführungen: Spiegel und weiß
- Außenfenster volltransparent oder in der halbmatten Ausführung Rain
- Topkapi bietet eine mit

Marmor erster Wahl verkleidete Quelle mit einer Stahlschale in Kupferausführung
- Topkapi beinhaltet ESS - Effegibi Sound System für die direkte Ansteuerung der Musik über das eigene Mobilgerät
- Intuitives und rückbeleuchtetes Touch-Bedienpaneel für die Dampf-, Temperatur-, Licht- und Farblichttherapie-Steuerung
- In der Säule integrierter Dampfgenerator, der einen einzigartigen Qualitätsstandard erfüllt

Marmor ist die Hauptfigur in Topkapi, ebenso wie in den historischen edelen Hamams der Türkei. Dieses außerordentliche, extrem langlebige und resistente Material fühlt sich ganz besonders an und unterstreicht das Wohlfühlerlebnis im türkischen Dampfbad.

H → 185

Hamams mit professionellen Leistungen und integrierter Dusche und Farblichttherapie. Ideal, um das heimische Badezimmer um eine Wellnesscke zu ergänzen.

Beschreibung:
- Hamam mit Dusche und Farblichttherapie
- Dampferzeugung mit Aquasteam-Technologie: maximale Kontrolle der Qualität Ihres Dampfes
- Inneres und Ausstattung aus laminiertem Feinsteinzeug, 3,5 mm; Türen aus gehärtetem 8-mm-Glas
- Erhältlich in sieben Farbvarianten
- Bequemer und praktischer Duschbereich, mit Thermostatischer, Handbrause und Deckenbrause 42x42 cm mit den Funktionen Regen und Nebel

TOUCH&STEAM → 205

Einsetzbar in jeder Dusche oder jedem Hamam-Bereich, Touch&Steam ist ein professioneller Generator im eleganten und leichten Design. Das Maximum der Technologie für die Dampfproduktion.

Beschreibung:
- Dampfgenerator mit Farblichttherapie und Aromatherapie
- Effegibi-Technologie für die Dampferzeugung: maximale Qualitäts-, Dichte- und Hygienekontrolle
- Ventilationssystem, das Temperaturschichten in der Kabine minimiert
- Geringer Wartungsaufwand dank des automatischen Reinigungssystems des Heizkessels, das Kalkansammlungen minimiert
- Elegantes und kompaktes Design

bestehend aus einer gehärteten siebbedruckten Glasscheibe, sichtbare Dicke: 3,7 cm
- Touch-Bedienpaneel mit rückbeleuchteten Icons und Temperaturanzeige
- ESS - Effegibi Sound System für die direkte Ansteuerung der Musik über das eigene Mobilgerät
- Intuitives und rückbeleuchtetes Touch-Bedienpaneel für die Dampf-, Temperatur-, Licht- und Farblichttherapie-Steuerung
- In der Säule integrierter Dampfgenerator, der einen einzigartigen Qualitätsstandard erfüllt

Türen und Verglasungen: Touch&Steam kann in jedem, für ein Hamam vorgesehenen Raum installiert werden: von der heimischen Dusche bis zu größeren Räumen, auch maßgerecht ausgelegt. Es ist wichtig, dass diese Räume mit speziellen für Hamam bestimmten Türen und Verglasungen versehen werden, die eine Isolierung vom Außenbereich und eine ausgewogene Luftpassage garantieren.

Touch&Steam bietet auch die Wohltaten der Farblichttherapie. Zur Auswahl stehen 5 Farben Dauerlicht (rot, gelb, grün, blau, aquamarinblau) und 4 Farbprogramme (Sonnenaufgang, Sonnenuntergang, Meer, Wald).

TRANSFORM YOUR SHOWER INTO A HAMMAM → 216

Verwandeln Sie Ihre Dusche in ein Hamam

Das Geheimnis für die Realisierung des idealen türkischen Dampfbads zuhause ist die perfekte Isolierung der Tür, sodass der Dampf im Inneren bleibt, während der richtige Lufteinlass von außen gewährleistet ist. Effegibi hat eine Reihe professioneller Türen für die Montage an der Duschkabine entwickelt, die eine konstante Dichte des Dampfes garantieren und den Energieverbrauch senken.

AQUATEAM → 219

Eine kurvige Glasscheibe mit digitalen Bedienelementen, die Quelle und eine Schale machen aus Aquasteam einen anwendungsfreudlichen Dampfgenerator, der perfekt zu jeder Verkleidung passt.

Beschreibung:
- Dampfgenerator mit Quelle, Schale, Aromatherapie
- Effegibi-Technologie für die Dampferzeugung: Hygiene, Kalkkontrolle und maximale Dampfqualität

- Geringer Wartungsaufwand und lange Lebensdauer dank des automatischen Reinigungssystems des Heizkessels
- Sehr kompaktes Design bestehend aus einer kurvigen siebbedruckten Glasscheibe, sichtbare Dicke: 3,7 cm
- Touch-Bedienpaneel mit rückbeleuchteten Icons und Temperaturanzeige
- Vorrüstung für den Anschluss an eine Farblichttherapie-Lampe
- Kombinierbar mit den eigens für Hamams entwickelten Türen und Verglasungen des Effegibi-Angebots

EASysteam → 227

Eleganter und kompakter Dampfgenerator, Easysteam vereint in sich eine einfache Installation, hochwertige Technologie und eine einfache Benutzung.

Beschreibung:
- Dampfgenerator mit Aromatherapie
- Effegibi-Technologie für die Dampferzeugung: Hygiene, Kalkkontrolle und maximale Dampfqualität
- Geringer Wartungsaufwand und lange Lebensdauer dank des automatischen Reinigungssystems des Heizkessels

- Sehr kompaktes Design bestehend aus einer kurvigen siebbedruckten Glasscheibe, sichtbare Dicke: 3,7 cm
- Touch-Bedienpaneel mit rückbeleuchteten Icons und Temperaturanzeige
- Vorrüstung für den Anschluss an eine Farblichttherapie-Lampe
- Kombinierbar mit den eigens für Hamams entwickelten Türen und Verglasungen des Effegibi-Angebots

Wie alle Produkte der Familie Touch ist Easysteam mit einem seitlichen Duftfach für ein berauscheinendes Aromatherapie-Erlebnis ausgestattet. Die Aromatherapie ist seit Jahrhunderten für ihre heilende Wirkung bekannt. Die im Hamam benutzten ätherischen Öle können helfen, den Körper und Geist zu erwecken, zu erfrischen, zu beleben oder zu entspannen.

NUVOLA SMART POWER → 235

Hochleistungsdampfgenerator, der außerhalb des Hamams montiert wird: modernste Technologie und klare Linien machen aus Nuvola Smart Power ein konkurrenzloses Produkt

Beschreibung:
- Professioneller außenseitiger Dampfgenerator für große Volumen
- Garantierte 3000 Betriebsstunden ohne Wartungsbedarf

- Dampf und Temperatur, stets perfekt dank des neuen Ventilationssystems
- Funktion ODS (Open Door Sensor): bei offenstehender Tür sperrt der Generator die Dampferzeugung
- Funktion SWF (Smart Water Filling): optimierte Kesselsteuerung für maximale Energieeinsparung und eine längere Lebensdauer
- Automatische Ansteuerung der Heizwiderstände für eine dauerhaft gleichmäßige Dampfverteilung
- Touch-Bedienpaneel mit rückbeleuchteten Icons und Temperaturanzeige
- Nuvola Smart Power eignet sich für Einbaulösungen und kann daher in nach Maß gefertigten Räumen eingesetzt werden

STEAMBOX → 274

Dampfaustrittsdüse: Nuvola Smart Power ist mit einer neuen hoch technologischen Dampfaustrittsdüse mit Ventilation ausgestattet, die für eine konstante Dampfdichte und -temperatur sorgt.

Nuvola Smart Power wird mit Leistungen von 2,5 bis 36 kW für Räume bis zu 50 m³ angeboten. Bei größeren Räume können Sie sich zur Entwicklung der passenden Lösung gerne an Effegibi wenden.

FEELGOOD → 249

Elegante koordinierte Kollektion für Ihren Wellnessbereich: türkisches Dampfbad, Multifunktionsdusche und Farblichttherapie, angesteuert über das hoch technologische Touch-Bedienpaneel von Effegibi.

Beschreibung:
- Koordiniertes System für den Duschbereich mit Dampfgenerator und Multifunktionsdusche
- FeelGood kann mit jedem Dampfgenerator von Effegibi kombiniert werden
- Touch-Bedienpaneel mit rückbeleuchteten Icons für die Ansteuerung von allen Funktionen (Dusche, Dampf, Licht)
- Dusche mit drei verschiedenen Wasserstrahlformen: Regen, Wasserfall und Nebel
- FeelGood kann leicht in Räumen nach Maß installiert werden.

OMNIATEAM TOUCH → 270

Vervollständigen Sie Ihre Dusche mit einer Tür Omniasteam Touch: Eine im Rahmen eingebaute Säule beinhaltet den Dampfgenerator und alle Funktionen für Ihr eigenes Hamam zuhause.

Beschreibung:
- Professioneller außenseitiger Dampfgenerator für große Volumen
- Garantierte 3000 Betriebsstunden ohne Wartungsbedarf

einfache Installation und passt sich verschiedenen Ansprüchen an.
- Erhältlich in zwei Ausführungen: Tür und Säule (88x198 cm) oder Tür, Säule und Verglasung (145x198 cm).
- Touch-Bedienpaneel mit rückbeleuchteten Icons für die Ansteuerung von allen Funktionen

- Funktion „Warmluftdusche“: Warmlufttheizung mit Funktion Raumvorheizen
- Funktion Power Steam: Ventilationssystem, das Temperaturschichten in der Kabine minimiert

ESS → 278

Steambox ist das geniale Bausystem für Hamamkabinen. Es ermöglicht einen schnellen Zusammenbau der Wände und ist für eine perfekte Isolierung vom Außenbereich und für die Aufrechterhaltung der optimalen Temperatur und Dampfqualität ausgelegt. Steambox ist ein Kit mit Polystyrolplatten in verschiedenen Stärken (10 cm und 5 cm) mit Netz und Zementputz, Duschwanne mit integriertem Ablauf und Decke mit schrägem Abschnitt. Es beinhaltet das gesamte für die Verleimung und Abdichtung erforderliche Material. Die Kabine kann je nach Kundenwunsch mit Fliesen oder Mosaik verklebt werden, ist in verschiedenen Konfigurationen erhältlich und garantiert eine leichte Montage der Dampfgeneratoren und der Türen Spazio Frameless, die eigens dafür entwickelt wurden.

SEATING AND SPRINGS → 291

Effegibi Sound System
Durch das Anschließen eines Tablets oder Smartphones an die Effegibi-Docking Station können Sie im Hamam oder im Raum, in dem es sich befindet, Ihre Lieblingsmusik hören. Die Beschallung im Inneren des Hamams und Sauna erfolgt über einen Lautsprecher, der sich in der Kabine befindet. Die mit zwei Stereoaltsprechern ausgestattete Docking Station schließt sich automatisch an den Lautsprecher im Inneren an, ohne dass eine Software installiert oder ein spezieller Anschluss vorbereitet werden muss.

OTHER ACCESSORIES → 296

Zubehör

Effegibi hat eigens für Saunen und Hamams abgestimmte Einrichtungsgegenstände wie Sessel, Liegen, Tische und Chaiselongue entwickelt, die Ihren Wellnessbereich mit Stil vervollständigen.

ECC → 279

Effegibi Comfort Control
Das System gestattet die Fernsteuerung Ihres türkischen Dampfbads oder Sauna über die entsprechende, auf Ihr Tablet

AROMATHERAPY

→ 301

Essenzen

Die Produkte von Effegibi ermöglichen die Diffusion von Duftessenzen, die die magische Atmosphäre in der Sauna und im Hamam vervollständigen.

Türen und Verglasungen

Effegibi diseña y fabrica, desde hace veinticinco años, saunas y baños turcos con tecnologías a la vanguardia

Effegibi se encuentra en el centro de una historia que nace de la tradición y llega hasta el futuro más innovador. La historia es la del bienestar, la de antiguos rituales como la sauna y el baño turco que actualmente asumen un aspecto contemporáneo gracias a tecnologías avanzadas y un diseño refinado. Detrás de esta evolución se encuentra una empresa que desde el 1987 ha dedicado su actividad sólo a este sector y que está orgullosa de ofrecer una producción de baños turcos y saunas totalmente italiana, desde la planificación del proyecto a la producción. Con esta filosofía Effegibi se ha convertido en el líder por méritos de este sector, conquistando la confianza de clientes de todo el mundo. Uno de los puntos de fuerza es el prestigio de las soluciones tecnológicas, siempre a la vanguardia, que garantizan productos de calidad certificada, de larga duración, con un mantenimiento reducido y ahorro energético. Además de buscar prestaciones y funcionalidades elevadas, Effegibi sabe perfectamente que bienestar significa también belleza y, por lo tanto, presta mucha atención también a la estética. Las saunas y los baños turcos se han diseñado con líneas limpias, trazadas por ilustres diseñadores, a menudo con grandes aperturas de vidrio que los transforman en elegantes objetos de mobiliario. Los materiales son ecomcompatibles, no se utiliza plástico, los tipos de madera son de primera calidad y no provienen de deforestación o de árboles en extinción. El extraordinario know-how de Effegibi se traduce en cuidadas soluciones a medida.

→ 10

Sauna y baño turco tienen beneficios similares pero orígenes y modos de empleo distintos

Sauna finlandesa

Un ritual que se ha extendido desde el norte de Europa a todo el mundo. En la sauna el calor puede alcanzar temperaturas de hasta 100 °C, pero gracias a la baja humedad (20-30%) se transforma en un agradable abrazo que relaja la musculatura y favorece la depuración del organismo. La madera emana el aroma de la naturaleza, una primitiva invitación a encontrar la serenidad de la mente liberando todas las tensiones. Primero construyes tu sauna y luego tu hogar. Este antiguo provecho finlandés explica cómo un

→ 4

simple baño de aire caliente y seco se puede convertir en el centro vital del propio bienestar cotidiano.

Baño turco

El agua es salud, incluso cuando asume la forma de una nube de vapor que envuelve el cuerpo. Lo descubrieron hace ya mucho tiempo los griegos, los romanos y los pueblos de Oriente Medio que han convertido el baño turco en una filosofía de vida. Al contrario que en la sauna, la humedad alcanza el 100% y las temperaturas no superan los 48 °C. Sentados en el mármol o en la piedra, envueltos por una niebla impalpable, se inhala el cálido vapor que descongestiona la respiración, librándonos a través del sudor de todas las toxinas. Nos alejamos del espacio circundante y advertimos sólo la percepción del propio cuerpo.

BODYLOVE

→ 21

Sistema modular que une sauna, baño turco y ducha: una auténtica spa personal, diseñada para ser versátil y elegante

En versión sauna + hammam, BodyLove permite diversas posibilidades de orientación y emplazamiento de las puertas de acceso a los dos espacios.

La estufa de la sauna de BodyLove está revestida con cerámica esmaltada, con colores únicos: un material de valor que destaca la suave belleza de la madera. La fuente de calor, elemento de importancia central en la tradición de la sauna finlandesa, ocupa de nuevo un papel de primer nivel incluso en la estética.

La propuesta de materiales de valor como cerámica y gres estimula la percepción del espacio bienestar como ambiente en continuidad con el exterior, en lugar de elemento técnico añadido y no integrado. BodyLove prevé la posibilidad de una personalización completa incluso en la selección de los materiales.

Funcional, elegante y de prestigio: Rodolfo Dordoni firma un proyecto que estimula todos los sentidos. Personaliza como quieras tu Spa, particular o pública, gracias a BodyLove, un sistema de composición modular que permite unir sauna, baño turco, ducha y área relax mediante disposiciones siempre nuevas y con materiales también personalizables.

Una plataforma en mármol Botticino contiene el grupo grifería (dosificador y mandos fuente + ducha) y un cuenco en acero efecto cobre para mojarse con agua fresca durante el baño de vapor.

Las paredes se proponen en dos esencias de madera distintas:

Hemlock natural y Madera maciza tratada térmicamente, con la posibilidad de introducir por encargo superficies en espejo.

Baño turco
Como todos los productos Effegibi, BodyLove ofrece muchas posibilidades de personalización en términos de selección y combinación de los materiales para realizar un espacio bienestar realmente a medida.

LOGICA

→ 37

Sauna y baño turco en una única solución, unidos por un elegante espacio ducha.

Logica contiene todas las funciones de un centro de bienestar completo, manteniendo un perfecto equilibrio entre funcionalidad, estética y tecnología.

Características:

- Sistema integrado con sauna, baño turco y ducha
- Tecnología Aquasteam para la generación del vapor, para un control total de la calidad

- Ducha equipada con alcachofa anticalcárea y mezclador con cartucho progresivo y desviador
- Materiales de calidad excepcional: madera Hemlock canadiense, revestimientos en gres laminado Slimtech® de 3,5 mm, puertas en vidrio templado de 8 mm

- ESS - Effegibi Sound System para el control de la música directamente desde el propio dispositivo (opcional)

- Disponible en siete acabados estándar o con colores personalizados
- Producto completo, disponible también para aplicaciones a medida

Materiales:
Logica se fabrica con tecnologías de última generación y materiales de gran valor: madera de Hemlock canadiense de primera calidad y gres laminado Slimtech®, combinado en las tarimas con vidrio templado de 15 mm

Controles Touch:
una columna central encierra los controles touch retroiluminados de la sauna, el hammam y la cromoterapia. Logica utiliza una tecnología sumamente avanzada para el control de las funciones, desarrollada por los técnicos Effegibi para que su uso sea sencillo e intuitivo. Nada interrumpirá su momento de relax.

LOGICA S

→ 92

El ritual de la sauna se completa con la zona ducha, proyectada con precisión para respetar plenamente la tradición finlandesa.

Toda la elegancia del sistema Logica en un espacio más reducido. La sauna y el baño turco se convierten en un auténtico proyecto de diseño

integrado con tu hogar.

Características:

- Sistema integrado con sauna y baño turco

- Para la generación del vapor se ha instalado Aquasteam, con función de ahorro de energía y sistema automático de lavado de la caldera
- Disponible en siete acabados estándar o con colores personalizados

- Materiales de calidad excepcional: madera Hemlock canadiense, revestimientos en gres laminado Slimtech® de 3,5 mm, puertas en vidrio templado de 8 mm

- ESS - Effegibi Sound System para el control de la música directamente desde el propio dispositivo (opcional)

- Logica SH es un remanso de bienestar en el hogar, versátil gracias a las tres variantes cromáticas.

MID

→ 69

Mid combina, en sólo 3 metros, sauna y hammam en un único y precioso objeto de diseño. La transparencia entre los ambientes hace que el impacto estético sea ligero y agradable.

Características:

- Sistema integrado de sauna y ducha con baño turco

ESPAÑOL

Perfect Wellnes

334

generación del vapor, para un control total de densidad e higiene

- Materiales de calidad excepcional:

- La estructura externa de la sauna se encuentra disponible en tres acabados estándar o con colores personalizados

- Sauna y ducha son dos elementos que se completan: los espacios se distribuyen de forma que todo sea cómodo y funcional

LOGICA H

→ 96

Air es una sauna de diseño original y contemporáneo, caracterizada por la suspensión de los asientos y por la simetría de las líneas, con la estufa en posición central: la ligereza se convierte en su característica dominante.

Características:

- Nueva línea de saunas firmada Talocci design

- Los bancos suspendidos aligeran el diseño y permiten la instalación en el suelo existente

- La estufa en posición central convierte Air en un lugar de encuentro, dónde relajarse en compañía

- La parte interna y las paredes están realizadas en madera Aspen de calidad, al natural o tratada térmicamente, muy resistente en el tiempo.

- ESS - Effegibi Sound System, para el control de la música directamente desde el propio dispositivo (opcional)

- Las superficies de los bancos se convierten, en la parte externa, en un taller y una funcional base de apoyo

- Amplias superficies de vidrio hasta el techo en cristal templado de 10 mm

- Las fuentes luminosas de Led colocadas debajo de los bancos destacan la ligereza del ambiente

GYM

→ 133

Una sauna con una estética sumamente versátil, caracterizada por amplias paredes de vidrio que llegan hasta el techo: un objeto luminoso y ligero, perfecto para cada ambiente.

Características:

- Sauna certificada, realizada en madera canadiense Hemlock de calidad y vidrios templados de 10 mm</li

BIOSAUNA → 170

La Biosauna es una sauna con niveles de temperatura entre los 50 y los 60 °C y una humedad de aproximadamente 60-70%. Gracias al vaporizador integrado, configurando la temperatura preferida, la estufa Bio creará el equilibrio perfecto entre calor y humedad.

El sistema combinado Effegibi permite elegir entre Biosauna, un recorrido a medio camino entre la sauna finlandesa y la naturaleza mediterránea del baño de vapor, o sauna tradicional, caracterizada por temperaturas de hasta 100 °C con baja humedad.

El sistema combinado se puede aplicar a todas las saunas Effegibi.

TOPKAPI → 175

La auténtica esencia de los antiguos hammam está representada por Topkapi: revestimientos en mármol de Carrara, Marquina o Mármol Botticino y un estándar de calidad sin iguales en la generación del vapor.

Características:
 - Baño turco equipado con ducha, fuente, bancos y cromoterapia
 - Materiales de nivel muy elevado: mármol en tres variantes, acero, vidrio templado, madera Teca natural de Birmania
 - Vidrios internos de fondo disponibles en doble acabado: espejo y blanco
 - Vidrios externos disponibles tanto completamente transparentes como en acabado efecto lluvia semimate
 - Topkapi dispone de una fuente revestida en mármol de primera calidad, equipado con cuenco en acero con acabado de cobre
 - Topkapi incluye ESS - Effegibi Sound System, para el control de la música directamente desde el propio dispositivo
 - Panel touch intuitivo y retroiluminado para gestionar vapor, temperaturas, luz y cromoterapia
 - Generador de vapor integrado en la columna que responde a un estándar de calidad único

El mármol es el protagonista en Topkapi como lo es en los hammam históricos más ricos de Turquía. Este extraordinario material, sumamente longevo y resistente, tiene un rendimiento táctil especial que amplifica el placer del baño turco.

H → 185

Serie de hammam con rendimiento profesional, equipados con ducha y

cromoterapia, ideales para completar el baño de casa con una zona dedicada al bienestar.

Características:
 - Hammam equipado con ducha y cromoterapia
 - Tecnología Aquasteam para la generación del vapor: el máximo del control sobre la calidad de tu vapor
 - Interno y mobiliario en Gres laminado 3,5 mm, puertas en vidrio templado de 8 mm
 - Disponible en siete variantes cromáticas
 - Espacio ducha cómodo y funcional, con mezclador termostático, ducha manual y alcachofa para ducha de techo de 42x42 cm con funciones lluvia y nebulización

TOUCH&STEAM → 205

El Touch&Steam, un generador de vapor profesional de diseño elegante y ligero, se puede acoplar a todas las duchas o ambientes hammam.

Características:

- Generador de vapor equipado con cromoterapia y aromaterapia
 - Tecnología Effegibi para la generación del vapor: el máximo control sobre calidad, densidad e higiene
 - Sistema de ventilación del aire que reduce al mínimo la estratificación de las temperaturas en el interior de la cabina
 - Mantenimiento reducido gracias al sistema automático de lavado de la caldera que reduce al mínimo la acumulación de cal
 - Diseño elegante y compacto formado por una placa de vidrio templado serigrafiado, con un grosor visible de 3,7 cm
 - Panel de control touch con iconos retroiluminados e indicador del nivel de temperatura
 - ESS - Effegibi Sound System, para el control de la música directamente desde el propio dispositivo (opcional)
 - Calentamiento ducha: sistema de calentamiento de ventilación forzada con función de precalentamiento del compartimento
 - Se puede combinar con las puertas y paredes de vidrio de la gama Effegibi, diseñadas de forma específica para hammam

Puertas y paredes de vidrio: Touch&Steam se puede aplicar en cualquier ambiente predisposto para albergar un hammam: desde la ducha de casa a espacios más amplios, incluso diseñados a medida. Es fundamental que a estas áreas se apliquen puertas y paredes de vidrio específicas para hammam, capaces de aislar desde el exterior manteniendo un paso calibrado de aire.

Con Touch&Steam se aprecian los beneficios de la cromoterapia. Se

puede escoger entre 5 colores en modalidad fija (rojo, amarillo, verde, azul, verde azulado) y 4 programas de variaciones de una gama cromática (alba, puesta de sol, mar, bosque).

TRANSFORM YOUR SHOWER INTO A HAMMAM → 216

Transforma tu ducha en hammam
 El secreto para realizar el baño turco ideal en el propio hogar es la utilización de un perfecto aislamiento de la puerta, de forma que el vapor se aísle en el interior, mientras se garantiza la entrada necesaria de aire del exterior. Effegibi ha estudiado una serie de puertas profesionales para aplicar en la cabina de ducha y que permiten mantener constante la densidad del vapor y reducir los consumos.

AQUASTEAM → 219

Una placa de vidrio curvada con controles digitales, una fuente y un cuenco hacen de Aquasteam un generador de vapor intuitivo en el uso y que se puede combinar perfectamente con cualquier revestimiento.

Características:
 - Generador de vapor con fuente, cuenco y aromaterapia
 - Tecnología Effegibi para la generación del vapor: higiene, control de la cal y máxima calidad del vapor
 - Mantenimiento reducido y larga duración gracias al sistema automático de lavado de la caldera
 - Diseño muy compacto formado por una placa de vidrio curvado serigrafiado con un grosor visible de 3,7 cm
 - Panel de control touch con iconos retroiluminados e indicador del nivel de temperatura
 - Función ODS (Open Door Sensor): el generador bloquea la producción de vapor si detecta que la puerta está abierta
 - Función SWF (Smart Water Filling): gestión optimizada de utilización de la caldera para el máximo ahorro energético y aumento de la duración
 - Control automático de las termosterrestres para una distribución de vapor uniforme en el tiempo
 - Panel de control touch con iconos retroiluminados e indicador del nivel de temperatura
 - Nuvola Smart Power es adecuado para soluciones empotrables y por tanto permite la aplicación en espacios realizados a medida

Generador de vapor elegante y compacto, Easysteam combina sencillez de instalación, elevada tecnología y sencillez de uso.

Características:
 - Generador de vapor con aromaterapia
 - Tecnología Effegibi para la generación del vapor: higiene, control

de la cal y máxima calidad del vapor
 - Mantenimiento reducido y larga duración gracias al sistema automático de lavado de la caldera
 - Diseño muy compacto formado por una placa de vidrio curvado serigrafiado, con un grosor visible de 3,7 cm

FEELGOOD → 249
Transforma tu ducha en hammam
 El secreto para realizar el baño turco ideal en el propio hogar es la utilización de un perfecto aislamiento de la puerta, de forma que el vapor se aísle en el interior, mientras se garantiza la entrada necesaria de aire del exterior. Effegibi ha estudiado una serie de puertas profesionales para aplicar en la cabina de ducha y que permiten mantener constante la densidad del vapor y reducir los consumos.

Como todos los productos de la familia touch, Easysteam dispone de cubeta lateral para las esencias para una embriagadora experiencia de aromaterapia.
 Se han reconocido desde hace siglos los efectos curativos de la aromaterapia. Los aceites esenciales utilizados en el hammam pueden ayudar a despertar, refrescar, estimular y relajar el cuerpo y la mente.

NUVOLA SMART POWER → 235

Generador de vapor de potencia elevada, a colocar en el exterior del espacio hammam: la tecnología existente más sofisticada y la limpieza formal convierten Nuvola Smart Power en un producto sin igual

Características:
 - Generador de vapor profesional externo, adecuado para amplios espacios
 - 3000 horas garantizadas de funcionamiento sin necesidad de mantenimiento
 - Vapor y temperatura siempre perfectos gracias al nuevo Sistema de ventilación del aire
 - Función ODS (Open Door Sensor): el generador bloquea la producción de vapor si detecta que la puerta está abierta
 - Función SWF (Smart Water Filling): gestión optimizada de utilización de la caldera para el máximo ahorro energético y aumento de la duración
 - Control automático de las termosterrestres para una distribución de vapor uniforme en el tiempo
 - Panel de control touch con iconos retroiluminados e indicador del nivel de temperatura
 - Nuvola Smart Power es adecuado para soluciones empotrables y por tanto permite la aplicación en espacios realizados a medida

Difusor de vapor: Nuvola Smart Power dispone de un nuevo difusor de tecnología elevada para mantener siempre uniforme la densidad y la temperatura del vapor

Nuvola Smart Power se encuentra disponible con potencias de 2,5 a 36

kw, para espacios de hasta 50 m³. Para ambientes de mayor tamaño es posible ponerse en contacto directamente con Effegibi para estudiar soluciones personalizadas.

FEELGOOD → 249

Elegante colección coordinada para vuestro espacio de bienestar: baño turco, ducha multifuncional y cromoterapia, todo gestionado desde el panel de control touch Effegibi de tecnología elevada.

Características:
 - Sistema coordinado para espacio ducha con generador de vapor y ducha multifunción
 - Se han reconocido desde hace siglos los efectos curativos de la aromaterapia. Los aceites esenciales utilizados en el hammam pueden ayudar a despertar, refrescar, estimular y relajar el cuerpo y la mente.

ESS → 278
Effegibi Sound System
 Conectando una Tableta o un Smartphone a la docking station Effegibi es posible escuchar la música preferida en el interior de la sauna, del hammam o en el ambiente en el que se encuentra. La difusión dentro del hammam y de la sauna se efectúa mediante un altavoz situado en el interior de la cabina. La docking station, equipada con dos cajas estéreo, se conecta de forma automática con el altavoz interno sin tener que instalar software o predisponer conexiones específicas.

OMNIATEAM TOUCH → 270

Completa tu ducha con una puerta Omniasteam Touch: una columna incluida en el bastidor contiene el generador de vapor y todas las funciones para crear en casa tu hammam personal.

Características:
 - Omniasteam Touch combina diseño, tecnología, comodidad de instalación y se adapta a las diversas necesidades.
 - Disponible en dos versiones: puerta y columna (88x198 cm) o bien puerta, columna y pared de vidrio fija (145x198 cm).
 - Panel de control touch con iconos retroiluminados para la gestión de todas las funciones
 - Función calentamiento ducha: sistema de calentamiento de ventilación forzada con función precalentamiento
 - Función Power steam: sistema de ventilación del aire que reduce al mínimo la estratificación de las temperaturas en el interior de la cabina

STEAMBOX → 274

Steambox es el genial sistema de fabricación del compartimento hammam que permite

ensamblado rápido de las paredes y está predisposto para un aislamiento perfecto desde el exterior. De esta forma se consigue un mantenimiento óptimo de la temperatura y de la calidad del vapor. Steambox es un kit que incluye paneles de poliestireno de diverso grosor (10 y 5 cm) con red y nivelación de cemento. Se completa con un plato de ducha con salida integrada y techo de sección inclinada. Se incluyen todos los materiales necesarios para el encolado y la impermeabilización.

DOORS AND GLASS PANELS → 282

Puertas y paredes de vidrio
 Las puertas especiales Effegibi para hammam se han diseñado para obtener una estanqueidad perfecta contra la salida del vapor, garantizando una recirculación correcta del aire. El acero inoxidable y el vidrio templado de 8 mm de grosor hacen que cada modelo sea muy duradero y fácil de combinar con el estilo de cada mobiliario. Gracias a las puertas Effegibi, incluso la sencilla ducha de casa se puede transformar en un perfecto baño turco.

SEATING AND SPRINGS → 291

Asientos - Fuentes
Effegibi Sound System
 Conectando una Tableta o un Smartphone a la docking station Effegibi es posible escuchar la música preferida en el interior de la sauna, del hammam o en el ambiente en el que se encuentra. OTHER ACCESSORIES → 296

Accesorios
 Effegibi ha estudiado complementos de mobiliario como butacas, tumbonas, mesas y chaise longue, que se combinan con saunas y hammam para completar con estilo tu área bienestar.

AROMATHERAPY → 301

Esencias
 Los productos Effegibi están predisuestos para la difusión de esencias perfumadas que completan la atmósfera mágica de sauna y hammam.

Более 25 лет Effegibi проектирует и изготавливает сауны и турецкие бани, применяя самые передовые технологии

Effegibi находится в центре истории, которая берет свои истоки в традициях и заканчивается самыми смелыми инновациями. Эта история про внутреннюю гармонию, про древние ритуалы очищения – сауну и турецкую баню, – которые сегодня обретают современный облик благодаря инновационным технологиям и изысканному дизайну. За всей этой историей стоит компания, которая с 1987 года производит исключительно сауны и хаммы, с гордостью предлагая свою продукцию, полностью изготовленную в Италии – начиная с проектирования и заканчивая производством. Благодаря такому подходу Effegibi завоевала статус лидера в этой отрасли, завоевав доверие клиентов во всем мире. Сильная сторона Effegibi в том, что компания разрабатывает превосходные инновационные технологические решения, которые всегда гарантируют сертифицированное качество, долговечность, минимальное обслуживание и экономию энергозатрат. Помимо разработки высокотехнологичных решений Effegibi заботится и об эстетических аспектах своей продукции. Сауны и турецкие бани выполнены в чистом, лаконичном стиле, в разработке которого принимали участие именитые дизайнеры. Изделия часто имеют большие остекленные поверхности, что делает их стильными предметами интерьера. В изготовлении изделий используются экологически чистые материалы, никакого пластика, древесина только высшего сорта и контролируемого происхождения (не используется древесина из зон обезсения или виды на грани исчезновения). Свои уникальные знания и мастерство Effegibi применяет и в разработке индивидуальных проектов.

→ 10

Сауна и турецкая баня в равной степени благотворно влияют на организм, но значительно отличаются своим происхождением и методом парения

Финская сауна

Ритуал очищения, который из Северной Европы распространился по всему миру. В сауне температура воздуха может достигать 100°C, но за счет низкой влажности (20-30%) такой сухой

→ 4

жар приятно обволакивает тело, расслабляя мышцы и способствуя очищению организма. Дерево источает аромат природы, снимая напряжение и умиротворяя наше тело и душу. Сначала построй сауну, а потом и весь дом. Эта древняя финская пословица свидетельствует о важной роли сауны в жизни любого человека и ее пользе для здоровья и хорошего самочувствия.

Турецкая баня

Вода означает здоровье, даже если она принимает форму облака из пара, обволакивающего наше тело. К такому выводу еще в древности пришли греки, римляне и ближневосточные народы, для которых ритуал парения был полон философского смысла. В отличие от сауны влажность здесь достигает 100%, а температура не переходит отметку в 48 °C. Удобно расположившись на мраморе или камне, окутанные неосязаемым туманом, вы вдыхаете теплый пар, который освобождает дыхание, через пот очищает организм от токсинов, изолирует вас от окружающего мира и заставляет прислушаться лишь к собственному телу.

BODYLOVE

Модульная система, включающая сауну, турецкую баню, душ: настоящий спа-салон для личного пользования

В версии BodyLove сауна + хаммам можно выбрать различные варианты размещения и направления дверей обоих модулей.

Каменка сауны BodyLove отделана эмалированной керамикой уникальных оттенков: этот благородный материал подчеркнет природную красоту дерева. Каменка, центральный элемент традиционной финской сауны, выходит на авансцену и в эстетическом плане.

Элитные отделочные материалы, такие как керамика и керамогранит, создают иллюзии слияния спа-зоны с окружающим пространством, без резких переходов или ощущения присутствия посторонней для интерьера технической детали. Систему BodyLove можно максимально персонализировать, в том числе благодаря выбору отделочных материалов.

Функциональный, элегантный, элитный: «роскошный минимализм» от Родольфо Дордони. Создайте свою территорию отдыха, лично для себя или для посетителей, благодаря сборной модульной системе BodyLove, позволяющей объединить сауну, турецкую

баню, душ и зону отдыха в единое спа-пространство с уникальной планировкой и отделкой.

Столешница из мрамора Боттичино оборудована сантехническими приборами (кран и регуляторы для умывальника + душ) и стальной чашей с имитацией меди для обливания прохладной водой во время парения.

Деревянные стены предлагаются в двух вариантах: натурального хемлока и термообработанного ясеня. Также по запросу можно вставить зеркальные элементы.

Система BodyLove, как и вся остальная продукция Effegibi, может быть максимально персонализирована благодаря широкому выбору и комбинации материалов.

LOGICA

Сауна, турецкая баня и элегантный душ в едином пространстве. Модель Logica выполняет все функции полноценного спа-центра, сочетая в себе функциональность, эстетику и высокие технологии.

Характеристики:

- Интегрированная система: сауна, турецкая баня и душ
- Парогенератор Aquasteam, позволяющий максимально управлять качеством пара
- Душевая лейка потолочной фиксации с функцией защиты от известкового налета, прогрессивный смеситель и дивертор
- Материалы превосходного качества: канадский хемлок, отделка из ламинированного керамогранита Slimtech® 3,5 мм, двери из закаленного стекла 8 мм

- ESS - Effegibi Sound System для дистанционного управления музыкой (опция)

- Три стандартных варианта отделки или отделка по индивидуальному заказу

- Полная комплектация, возможна разработка индивидуального проекта

Материалы:
Модель Logica изготовлена с применением самых передовых технологий из материалов первоклассного качества: отборной древесины канадского хемлока и ламинированного керамогранита Slimtech® в сочетании с закаленным стеклом 15 мм на полу.

Сенсорная панель управления: Центральная колонна оборудована сенсорной панелью с задней подсветкой для управления сауной, хаммамом и цветным освещением. Высокотехнологичная панель управления модели Logica разработана специалистами

Effegibi для легкого и интуитивного пользования. Ничто не помешает Вам расслабиться.

LOGICA SH

→ 54

Элегантный дизайн Logica в более компактном исполнении. Сауна и парная становятся настоящим предметом дизайна, гармонирующими с интерьером Вашего дома.

Характеристики:

- Интегрированная система: сауна и турецкая баня
- Парогенератор Aquasteam с функцией энергосбережения и системой автоматической очистки нагревателя
- Материалы превосходного качества: канадский хемлок, отделка из ламинированного керамогранита Slimtech® 3,5 мм, двери из закаленного стекла 8 мм

- ESS - Effegibi Sound System для дистанционного управления музыкой (опция)

- Logica SH – это оазис релаксации и здоровья, который идеально впишется в Ваш интерьер благодаря трем вариантам исполнения

Характеристики:

- Интегрированная система: сауна, турецкая баня и душ
- Парогенератор Aquasteam, позволяющий максимально управлять качеством пара
- Душевая лейка потолочной фиксации с функцией защиты от известкового налета, прогрессивный смеситель и дивертор
- Материалы превосходного качества: канадский хемлок, отделка из ламинированного керамогранита Slimtech® 3,5 мм, двери из закаленного стекла 8 мм

- ESS - Effegibi Sound System для дистанционного управления музыкой (опция)

- Три стандартных варианта отделки или отделка по индивидуальному заказу

- Полная комплектация, возможна разработка индивидуального проекта

Характеристики:
Модель Logica изготовлена с применением самых передовых технологий из материалов первоклассного качества: отборной древесины канадского хемлока и ламинированного керамогранита Slimtech® в сочетании с закаленным стеклом 15 мм на полу.

Сенсорная панель управления: Центральная колонна оборудована сенсорной панелью с задней подсветкой для управления сауной, хаммамом и цветным освещением. Высокотехнологичная панель управления модели Logica разработана специалистами

- Полная комплектация, возможна разработка индивидуального проекта

- Удобное и функциональное душевое пространство, смеситель с термостатом, ручной душ и душевая лейка потолочной фиксации 42x42 см с имитацией дождя и тумана

LOGICA S

→ 92

Ритуал очищения в сауне завершается в душевой кабине, созданной в лучших финских традициях.

Характеристики:

- Интегрированная система: финская сауна и душ
- Весь модуль сауны отделан канадским хемлоком – отборной древесиной, используемой в традиционных финских саунах.
- ESS - Effegibi Sound System для дистанционного управления музыкой (опция)
- Три стандартных варианта отделки или отделка по индивидуальному заказу
- Сауна и душ гармонично дополняют друг друга: удобная и функциональная организация пространства

LOGICA H

→ 96

Logica H объединяет турецкую парную и душевую кабину в едином пространстве для ежедневной релаксации и здоровья.

Характеристики:

- Интегрированная система: турецкая баня и душ
- Высокотехнологичный парогенератор Aquasteam – самое лучшее оборудование для турецкой бани
- Материалы превосходного качества: отделка из ламинированного керамогранита Slimtech® 3,5 мм, двери из закаленного стекла 8 мм

- ESS - Effegibi Sound System для дистанционного управления музыкой (опция)

- Три стандартных варианта отделки или отделка по индивидуальному заказу

- Панель управления Effegibi с яркой светодиодной подсветкой

для идеального отображения символов даже в условиях насыщенного пара

Aquasteam – это компактный и стильный парогенератор. На элегантно изогнутой стеклянной панели расположены сенсорные кнопки с задней подсветкой, позволяющие легко и интуитивно управлять работой хаммама. Aquasteam оснащен встроенным умывальником с

регулируемой подачей воды и чашей в лучших традициях турецкого хаммама.

**ONE S
ONE H**

→ 101

Две модели, выполненные в едином элегантном и функциональном стиле: One S – максимально функциональное исполнение, One H – гармоничное сочетание эстетики и технологии.

Кабины можно свободно комбинировать для создания индивидуальных проектов спа-комплексов для домашнего и общественного пользования.

Характеристики:

- Сауна и хаммам можно объединить в единую композицию или разместить отдельно
- One H оснащен парогенератором Aquasteam 45, который позволяет максимально контролировать подачу пара и поддерживать высокий уровень гигиены.
- Материалы превосходного качества: сауна выполнена из канадского хемлока, а хаммам отделан ламинированным керамогранитом Slimtech® толщиной 3,5 мм

- ESS - Effegibi Sound System для дистанционного управления музыкой (опция)

- Три стандартных варианта отделки или отделка по индивидуальному заказу

- Универсальность применения: в спа-салонах, фитнес-центрах или в домашних условиях

Л'Идеальный климат в турецкой бане достигается, когда горячий пар позволяет температуре подняться выше 40°C. Достижение данной температуры зависит от количества пара в кг/ч (единица измерения парообразования), произведенного парогенератором.

Парогенераторы Effegibi полностью отвечают данному требованию, что гарантирует Вам качественный отдых и более долговечное функционирование Вашей турецкой бани.

Внутри кабина One H облицована ламинированным керамогранитом Slimtech®, обработанным таким образом, чтобы при соприкосновении в коже дарить ощущение теплого натурального камня.

SKY

→ 110

Универсальная стилистическая концепция сауны достигается за счет прозрачного стекла, установленного во всю высоту фасада сауны: благодаря такой легкой конструкции модель

идеально гармонирует с любым интерьером.

Характеристики:

- Сауна сертифицирована, она изготовлена из отборной древесины канадского хемлока и закаленного стекла 10 мм с низкой эмиссионной способностью
- Стеклянные фасад, двери и потолок сауны Sky стирают границы пространства и дарят ощущение свободы.
- Три варианта исполнения: Glass (только стекло), Techno и Deco
- ESS - Effegibi Sound System для дистанционного управления музыкой
- Благодаря своей универсальной стилистике модель идеально подходит для разработки индивидуальных проектов.

- ESS – Effegibi Sound System для дистанционного управления музыкой (опция)

- Наружные торцы лежаков выполняют функцию держателей для полотенец и практичных полок

- Обширная площадь остекления во всю высоту фасада: закаленное стекло 10 мм

- Светодиодная подсветка под лежаками усиливает ощущение воздушной легкости

Гармоничный дизайн, высококачественные материалы и продуманная конструкция делают сауны Gym практичным, надежным и выгодным решением для гостиниц, спортивных залов, общественных бань, салонов красоты.

Характеристики:

- Сауна сертифицирована IMQ, она изготовлена из отборной и долговечной древесины канадского хемлока
- Благодаря специальной механической системе лавки и покрытия легко снимаются для проведения быстрой ежедневной уборки
- Широкая дверь, оснащенная прочными петлями, позволяет выпускать из помещения сауны большое количество людей
- Конструкция монтируется на алюминиевое основание, таким образом, древесина не контактирует с полом
- ESS – Effegibi Sound System для дистанционного управления музыкой (опция)
- Благодаря своей универсальной стилистике модель идеально подходит для разработки индивидуальных проектов.

Air – это сауна с оригинальным современным дизайном, в котором доминирует концепция воздушной легкости, выраженная подвеской конструкций лежаков, симметричными линиями и центральным расположением каменки.

Характеристики:

- Новая линия саун, разработанная при поддержке студии Talocci Design
- Подвесенные лежаки делают конструкцию более легкой и позволяют установить сауну на существующий пол
- Каменка, расположенная по центру кабинки, делает Air местом встречи и релаксации в компании
- Внутренняя отделка и стены выполнены из ценной и долговечной древесины липовой осины (с термообработкой или в натуральном виде)

NATURAL MATERIALS → 163	парогенерации.	Характеристики: - Парогенератор с функциями хромотерапии и ароматерапии - Технология парогенерации от Effegibi: максимальный контроль качества, насыщенности и гигиеничности пара - Система вентиляции оптимизирует равномерное распределение температуры внутри кабинки. - Задние стеклянные стены в двух вариантах исполнения: зеркальные и белые - Внешние стены из прозрачного стекла или полуматового стекла «дождь» - Умывальник из отборного мрамора со стальной чашей медного цвета - ESS – Effegibi Sound System для дистанционного управления музыкой - Сенсорная интуитивная панель с задней подсветкой позволяет управлять паром, температурой, освещением и хромотерапией - Парогенератор, встроенный в колонну, соответствует международному стандарту качества	AQUATEAM → 219	Парогенератор Aquasteam представляет собой изогнутую стеклянную панель с интуитивным цифровым управлением, умывальником и чашей. Aquasteam отлично гармонирует с любым стилем душевой кабинки.
H → 185		Мрамор является основным элементом Torkapi, как это полагалось в самых роскошных древних хаммамах Турции. Этот уникальный материал, невероятно прочный и долговечный, дарит удивительно приятные ощущения во время парения.	EASYTEAM → 227	Двери и секции: Touch&Steam может быть установлен в любом помещении, пригодном для хаммама: в душевой кабине или в более просторном помещении, в том числе созданном по индивидуальному проекту. Важно, чтобы кабина хаммама была оснащена специальными дверьми и секциями, обладающими необходимыми изолирующими свойствами и при этом обеспечивающими определенный приток воздуха.
BIOSAUNA → 170		Профессиональный хаммам с душем и цветным освещением великолепно украсит обстановку в любой душевой и бане.	Touch&Steam оснащен освещением с хромотерапией. Выбирайте один из 5 цветов (красный, желтый, зеленый, синий, аквамарин) или одну из 4-х программ хромотерапии (рассвет, закат, море, лес).	Характеристики: - Хаммам с душем и цветным освещением - Парогенератор Aquasteam: позволяет максимально контролировать качество пара - Внутренняя отделка и предметы интерьера из ламинированного керамогранита 3,5 мм. Дверь из закаленного стекла 8 мм - Три варианта исполнения - Удобное и функциональное душевое пространство, смеситель с терmostatom, ручной душ и потолочный верхний душ 42x42 см с имитацией дождя и тумана
TOUCH&STEAM → 205		Превратите Вашу душевую кабину в хаммам	TRANSFORM YOUR SHOWER INTO A HAMMAM → 216	Секрет создания идеальной турецкой бани у себя дома состоит в тщательной изоляции двери, удерживающей пар внутри кабинки, и создании зазора для обеспечения притока необходимого количества свежего воздуха. Effegibi разработала серию профессиональных дверей для установки в душевые кабинки, позволяющих поддерживать постоянное количество пара и снизить потребление электроэнергии.
TOPKAPI → 175		Хаммам Topkapi объединяет в себе основные элементы древних турецких хаммамов: каменный интерьер из мрамора Carrara, Мозаичина или Botticino и беспрецедентную технологию		Как и все изделия серии Easysteam, парогенератор оборудован контейнером для ароматных эссенций, позволяющим совместить парение с ароматерапией. С давних времен эфирные масла славятся своими целебными свойствами. Перемешанные с паром в хаммаме, они способны пробудить, освежить, взбодрить или расслабить тело и разум.
NUVOLA SMART POWER → 235		Парогенератор, которому нет равных. Предназначенный для размещения вне кабины хаммама, парогенератор Nuvola Smart Power – это самая мощная и изощренная на сегодняшний день технология парогенерации в элегантном и лаконичном оформлении.	OMNIASTEAM TOUCH → 270	Парогенератор, которому нет равных. Предназначенный для размещения вне кабины хаммама, парогенератор Nuvola Smart Power – это самая мощная и изощренная на сегодняшний день технология парогенерации в элегантном и лаконичном оформлении.
ESS → 278		Подключив планшет или смартфон к док-станции Effegibi, Вы сможете слушать любимую музыку как внутри сауны или хаммама, так и во внешнем помещении, в котором установлена кабина. Воспроизведение музыки внутри хаммама осуществляется посредством динамика, установленного внутри кабинки. Док-станция, оснащенная двумя стерео-колонками, автоматически соединяется с динамиками в кабине и не требует установки специального программного обеспечения или создания особых соединений.	SEATING AND SPRINGS → 291	Сиденья - Умывальники Серия предметов мебели изготовлены специально для кабины хаммама и душевой из легко чистящихся и влагостойких материалов.
OTHER ACCESSORIES → 296				Аксессуары Специалисты Effegibi разработали предметы интерьера, такие как кресла, лежаки, столы и шезлонги, которые станут стильным дополнением к Вашей сауне или Вашему хаммаму.
AROMATHERAPY → 301				Эссенции Изделия Effegibi оборудованы системой ароматизации воздуха, дополняющей волшебную атмосферу сауны и хаммама.
FEELGOOD → 249		Элегантная координированная коллекция для вашего персонального спа: турецкая баня, многофункциональный душ и хромотерапия. Все управление выведено на высокотехнологичную сенсорную панель Effegibi.	STEAMBOX → 274	Effegibi Comfort Control Система установлена на каждом парогенераторе Effegibi и позволяет дистанционно управлять турецкой баней при помощи специального приложения Effegibi Experience для планшетов и смартфонов. Вы можете управлять различными функциями изделия из любого помещения в доме: приложение позволяет программировать время включения, температуру нагрева и цвет освещения. Более того, наличие Wi-Fi в помещении, где установлена сауна, позволяет дистанционно управлять ее функциями из любой точки вне дома (офис, автомобиль и т.д.). Кроме того, приложение Effegibi Experience содержит познавательную информацию об изделии: начиная с того, как лучше пользоваться хаммамом, и заканчивая его полезными свойствами и историей этого древнего ритуала.
DOORS AND GLASS PANELS → 282				Двери и стеклянные панели Двери для хаммамов Effegibi специально разработаны для удержания пара внутри кабин и обеспечения необходимой рециркуляции воздуха. Нержавеющая сталь и закаленное стекло толщиной 8 мм обеспечивают долговечность изделия и его сочетаемость с любым стилем интерьера. Благодаря дверям Effegibi даже обычная душевая кабина может быть преобразована в идеальную турецкую баню.

 从北欧流行到全世界的一种
洗浴仪式。在桑拿浴中，
温度最高可以达到100°C，
但是因为相对较低的湿度

(20-30%)，这种热量被转
化为如同温暖的怀抱一般，
能帮助有效的放松肌肉并净
化机体。从桑拿房中我们可
以感受到木材散发出的自然
香气，让我们缓缓的放松大
脑，释放压力。“先打造桑拿
浴室，再建造自己的家”。这
句芬兰的古话，道出了芬兰
桑拿浴这项高温干燥的洗浴
方式，可以成为我们日常生
活的健康中心。

土耳其浴

水关乎健康，即使变成云雾
状，环绕在人体四周的时
候。早在远古时代，古希腊
人、古罗马人以及中东人就
将土耳其浴视作一种生活哲
学。和桑拿浴相反，土耳其
浴的湿度可以达到100%，
但温度不会超过48°C。坐在
大理石或石头上，周身雾气
缭绕，通过温和的蒸汽的作
用，呼吸变得顺畅，各种毒
素都顺着汗液排出体外，在
所处的环境中静静感知身体
的呼唤。

BODYLOVE → 21
 结合桑拿浴、土耳其浴、淋
浴为一体的整体模块系统：
 一款设计优雅而多变的真正
专属私人洗浴空间

BodyLove系列的桑拿浴+土

过背光式触控屏，集中对桑
拿浴、土耳其浴以及彩色灯
光疗法进行操作控制。Effegibi
技术人员秉承外观简洁、操
作简便的产品理念，为您提
供完全放松的SPA环境。

LOGICA S → 92
 Aquasteam系列蒸汽发生器
的设计，具有紧凑而美观的
特点。

弧形玻璃面板上配置了
碰触式按键和Led背透式
灯光，操作简便，可视性
强。Aquasteam系列还特别
具备泉水输送功能，通过指
尖的碰触，使冷水流入配置
的树脂水钵内，这正与古老
的土耳其浴传统相呼应。

生活的理想选择，彩色光疗
系统将您带入多彩的世界。

在环境中，如果表面蒸汽含
量超过水的含量，在皮肤表
面形成一层潮湿薄膜，给身
体带来热量。
 此类蒸汽及热量的反应将有
助于淋巴系统血液循环，加
快身体排毒。

MID → 69

Mid系列成功在3米的空
间内，将桑拿浴和土耳其浴进
行了极具设计感的完美结
合。空间的透明设计使得产
品外观显得轻盈简洁而惹人
喜爱。

特点：

- 桑拿浴、土耳其浴与淋浴功
能完美融合。
 - Aquasteam系列蒸汽发生
器：专供土耳其浴的最佳科
技

- Mid系列包含ESS-Effegibi
声控系统，可以直
接从设备上控制播
放的音乐（可选配置）。

- 优质材料：优选加拿大
铁杉木，厚度为3.5mm的
Slimtech®陶瓷层压板，以
及经过淬火处理的厚度为8mm
的钢化玻璃门板。

- 可提供三种标准外观效果，
或进行个人定制颜色。

- 产品功能完整，可以按照需
求进行尺寸定制

- 淋浴空间舒适且功能强大，
配置恒温控水器，手持花洒
及42x42cm的头顶大花洒，
具备“雨水”和“水雾”效果。

LOGICA S → 92

特点：

- 芬兰桑拿浴及淋浴合二为一
- 整个桑拿空间均采用优质加
拿大铁杉木，是用于芬兰桑
拿浴最珍贵的木材。

- ESS-Effegibi声控系统，
可以直接从设备上控制播
放的音乐（可选配置）。

- 桑拿浴可提供三种标准的外
观效果，或进行个人定制。

- 桑拿浴及淋浴相互融合：营
造舒服而功能强大的空间。

LOGICA H → 96

Logica湿蒸系列神奇的将
土耳其浴与淋浴空间合为一
体，使之成为我们日常生活
中的健康空间。

特点：

- 土耳其浴与淋浴空间融合
为一体。
 - 使用高端技术Aquasteam
系列蒸汽发生器

- 优质材料：土耳其浴系
列使用厚度为3.5mm的
Slimtech®超薄陶瓷层压板，
密封门则采用经过淬火处理
的8mm厚钢化玻璃。

- ESS-Effegibi声控系统，
可以直接从设备上控制播
放的音乐（可选配置）。

- 三种标准表面效果可供选
择，或进行个性颜色定制。

- 适用于多种类型空间，比
如SPA中心、健身房或者自己
家中。

想获得完美的土耳其浴体
验，就需要保证时刻拥有均
衡而持久的高浓度蒸汽，且
温度超过40°C。Effegibi的

**ONE S
ONE H**

SKY

→ 101

两款产片来源于同一个优雅
而理性的设计：One S桑拿浴
系列功能丰富，One H湿蒸
系列则展现出外观与技术的
完美结合。

两款SPA可以轻松而完美的
结合在一起，打造理想的个
人或公共SPA洗浴空间，可
以根据项目情况进行灵活搭
配。

特点

- 通过认证的整体桑拿房，使
用珍贵的加拿大铁杉木，以
及厚度为10mm的经过淬火
处理的低排放钢化玻璃。
 - 桑拿浴室正面、门、顶部
均采用玻璃面板，赋予了
SKY系列极度透明而轻盈的
感受。

- 提供三种设计可供选择：
Glass风格（只含玻璃），
Techno风格以及Deco风
格。

- ESS-Effegibi声音系统，可
以在自己的设备上控制播
放的音乐（可选配置）。

- 适用性极广，为定制款桑拿
浴室的最理想选择。

SKY CORNER → 123

SKY系列的新款桑拿房，更
大范围采用玻璃面板：营造
了一个明亮、舒适的透明角
落。

特点

- 通过认证的整体桑拿房，使
用珍贵的加拿大铁杉木，以
及厚度为10mm的经过淬火
处理的低排放钢化玻璃。

- 桑拿浴室正面、门、顶部
均采用玻璃面板，赋予了
SKY系列极度透明而轻盈的
感受。

- ESS-Effegibi声音系统，可
以在自己的设备上控制播
放的音乐（可选配置）。

- 适用性极广，为定制款桑拿
浴室的最理想选择。

AIR → 133
Air 系列桑拿浴为原创现代设计，悬空式座椅，对称式结构线条，居中式桑拿炉：简洁轻便是这款桑拿房的主要特点。

特点

- 新款桑拿房印有设计师 Talocci 的签名。
- 悬空长椅使得设计更显轻巧，并且桑拿房可以安装在已经铺好地板的地面上。
- 居中式桑拿炉使得 Air 系列桑拿房成为相聚的休闲场所，人们可以在相互陪伴下休息放松。
- 内部及墙板选用产自立陶宛的天然或热恒温处理的白杨木材，使得此款桑拿房长久耐用。
- ESS-Effegibi 声音系统，可以在自己的设备上控制播放的音乐（可选配置）。
- 长凳的层次在桑拿房外成为摆放毛巾或可用的背靠。
- 桑拿房表面大范围采用经过高温淬火处理的钢化玻璃，厚度为 10mm。
- 长椅下置的 LED 背光灯使得整个环境显得尤为轻松而愉悦。

GYM → 147
这款桑拿房坚实耐用，实用性强，优雅的产品设计适合搭配各种环境：这是 Effegibi 专为酒店、SPA 中心、健身中心以及休闲会所量身打造的桑拿产品。

特点：

- 通过 IMQ 认证的整体桑拿房，使用优质加拿大铁杉木，持久耐用。
- 长凳及保护装置均采用易拆卸系统，用来方便进行日常清理。
- 配置宽幅的门板并采用更为坚固的铰链，方便多人同时通过。

- 桑拿房置于四周用铝条围起的地台上，以避免木材与地板直接接触。
- ESS-Effegibi 声音系统，可以在自己的设备上控制播放的音乐（可选配置）。
- 多种选择，适用于各种环境甚至大空间定制。

AUKI

→ 155

BIOSAUNA

→ 170

完全采用芬兰珍贵的云杉木或加拿大无结铁杉木制成，Auki 系列展现了北欧传统古老的桑拿浴与现代设计的完美结合。

特点：

- 通过 IMQ 认证的整体桑拿房，使用珍贵的木材及经过淬火处理的低排放钢化玻璃，厚度为 8mm。
- 内部及外部墙体可由不同宽度的木条组成，极具特色。
- ESS-Effegibi 声音系统，可以在自己的设备上控制播放的音乐（可选配置）。
- Auki 适用于已有空间的需求，也可根据实际情况提供尺寸定制。

NATURAL MATERIALS

→ 163

天然材料

桑拿浴需要经受很高的温度，可以达到 100°C 的室内温度。因此，所选材料必须保证极高的质量。Effegibi 的桑拿浴室从不使用塑料材料，因为随着温度的不断升高，从塑料中可能释放出有毒物质。相反，使用天然木材可以保证健康的环境，舒适的触感，经久耐用而不变形。

木材的选择

制作桑拿房所选用的木材，需要具备承受高温，且在温度高低变化下依然稳定不变形的特点。Effegibi 内部严格执行所有必要测试，以保

证选择的木材在长期使用中，依然能保持桑拿起初的外观特点及使用特性。从加拿大铁杉木到传统的瑞典云杉木，Effegibi 精心挑选出十多种优质木材，所有材料均通过严格的质量把控，以保证卓越的产品质量标准。

石，配置抛光铜漆面处理的不锈钢水钵。

- Topkapi 系列配置 Effegibi 声音系统（EES），可在自己的设备上控制播放的音乐（可选配置）。

- 带背光灯的碰触式控制面板，用来调节蒸汽、温度、灯光及彩色光谱疗法。

- 蒸汽发生器嵌入在大理石柱体内，符合统一的质量标准。

生态桑拿浴系列

Biosauna 生态桑拿浴是桑拿浴的一种，通常温度可达 50°C 到 60°C，湿度可达到 60% / -70%。通过内置蒸汽生成器，对喜欢的温度进行设置，Biosauna 生态桑拿浴可以创造温度与湿度的完美平衡。

Effegibi 这种组合系统，可以为您提供 Biosauna 生态桑拿浴，一种介于芬兰桑拿浴和地中海蒸汽浴的折中方案，或者能够达到 100°C 高温、相对干燥的传统芬兰桑拿浴。

这种组合系统可以应用于 Auki 适用于已有空间的需求，也可根据实际情况提供尺寸定制。

TOPKAPI

→ 175

Topkapi 系列是古老的土耳其浴的纯粹代表：外饰面选用卡拉拉大理石、黑白根大理石或米黄大理石，配置了相同质量标准下外形各异的蒸汽发生器。

特点：

- 土耳其浴完整配置了淋浴和彩色光谱疗法。
- 采用 Aquasteam 技术蒸汽发生器：提供全方位监控的高品质蒸汽。

- 内部装饰采用 3.5mm 的 Slimtech® 超薄陶瓷层压板，门板采用经过淬火处理的 8mm 厚钢化玻璃。

- 提供三种不同颜色的边框漆面。

- 淋浴空间舒适而功能性强，配置恒温控水器、手持花洒以及 42x42cm 头顶花洒，提供雨式出水和雨雾出水模式。

TOUCH&STEAM

→ 205

制作桑拿房所选用的木材，需要具备承受高温，且在温度高低变化下依然稳定不变形的特点。Effegibi 内部严格执行所有必要测试，以保

可安装在任何淋浴间或蒸汽室的 Touch&steam 蒸汽发生器，是一款设计优雅而轻盈

的专业蒸汽设备，是当生产蒸汽的最先进技术。

特点

- 蒸汽发生器配置彩色光谱疗法及香氛疗法。

- Effegibi 技术研发的蒸汽发生器：严格控制蒸汽的质量、浓度及清洁度。

- 空气推送系统可以保证蒸汽房内的温度平均分布。

- 锅炉自动清洗功能可以降低维护频率，以及减少石灰石的生成与堆积。

- 设计优雅而紧凑，仅由一块丝网钢化玻璃面板制成，可见厚度仅为 3.7cm。

- 触摸式控制面板，配置背光式图标以及温度指示器。

- ESS-Effegibi 声音系统，可以在自己的设备上控制播放的音乐（可选配置）。

- 暖浴功能：配置预加热系统，通过热风推送来预先加热空间的温度。

- 可以和 Effegibi 品牌的任意门板及玻璃面板进行搭配，尤其适用于专业土耳其浴室设计。

门板和玻璃：

Touch&Steam 系列可安装在任何土耳其浴内：从家庭的淋浴间到更大的健康空间，以及特殊定制类的空间。

给蒸汽浴室配置专用的蒸汽密封门板和玻璃，是使蒸汽完全锁定在浴室内并与外界新鲜空气进行交换的根本保障。

TRANSFORM YOUR SHOWER INTO A HAMMAM

→ 216

将您的浴室升级成土耳其蒸汽浴室

将自家浴室变成理想的土耳其蒸汽浴室的秘密所在，就是安装具有完好密封功能的蒸汽房专用门板，即保证了浴室内部的蒸汽不外泄，也保证了与外界新鲜空气定量的交换。Effegibi 研发了一系列蒸汽房专用门板，用于维

持浴室内蒸汽的浓度以及有效降低能耗。

特点

AQUASTEAM → 219

一块弧形折弯的玻璃触控面板，水流及水钵的配置使得 Aquasteam 系列蒸汽发生器更加实用且操作便捷，可与任意外饰面完美搭配。

特点

- 带流水系统的蒸汽发生器，水钵以及香氛疗法。

- Effegibi 技术研发的蒸汽发生器：严格控制蒸汽的质量、浓度及清洁度。

- 锅炉自动清洗功能可以降低维护频率并延长使用寿命。

- 设计优雅而紧凑，仅由一块丝网钢化玻璃面板制成，可见厚度仅为 3.7cm。

- 触摸式控制面板，配置背光式图标以及温度指示器。

- 预留彩色光谱疗法系统选配连接口。

- 可以和 Effegibi 品牌的任意门板及玻璃面板进行搭配，尤其适用于专业土耳其浴室设计。

EASysteam

→ 227

一款设计优雅而结构紧凑的蒸汽发生器，Easysteam 系列安装简单，技术先进，使用方便。

特点

- 配有香氛功能的蒸汽发生器。

- Effegibi 技术研发的蒸汽发生器：严格控制蒸汽的质量、浓度及清洁度。

- 锅炉自动清洗功能可以降低维护频率并延长使用寿命。

- 设计优雅而紧凑，仅由一块丝网钢化玻璃面板制成，可见厚度仅为 3.7cm。

- 触摸式控制面板，配置背光式图标以及温度指示器。

连接口。

- 可以和 Effegibi 品牌的任意门板及玻璃面板进行搭配，尤其适用于专业土耳其浴室设计。

正如所有的触碰式产品一样，Easysteam 蒸汽发生器也在产品边缘设计了盛放精油的容器，以提供美妙的香芬治疗体验。

香氛疗法存在的几个世纪以来，已被证实具有实际功效。土耳其浴中使用的香氛精油，可以给人体及大脑带来唤醒、清新、促进、放松的感受。

NUVOLA SMART POWER

→ 235

高功率蒸汽发生器，需放置于土耳其浴室外部：成熟的先进技术及自动清洁功能，使得 Nuvola Smart Power 系列蒸汽发生器在同类产品中占据遥遥领先地位。

特点

- 专为蒸汽浴室打造的多功能淋浴花洒。FeelGood 淋浴花洒可以和 Effegibi 品牌任何一款蒸汽发生器搭配使用。

- 触碰式控制面板，配置背光图标，以控制所有功能的使用（淋浴、蒸汽、灯光）。

- 淋浴花洒有 3 种出水方式：雨水效果，瀑布效果以及迷雾效果。

- FeelGood 淋浴花洒适用于定制的空间，安装方便。

蒸汽扩散装置：Nuvola Smart Power 配备了一款新型高科技蒸汽散发装置，其中包括送风功能，这样保持蒸汽的浓度与温度均匀分布。

Nuvola Smart Power 系列的可用功率从 2.5kw 到 36kw 不等，适用的最大使用空间可达到 50 立方米。如果需使用于更大的空间，可直接向 Effegibi 工厂进行咨询，研究可行的客户解决方案。

FEELGOOD

→ 249

为您的健康空间特别打造的优雅设计：土耳其浴、多功能彩色光谱淋浴花洒，均由 Effegibi 研发的高科技触控面板进行管理。

特点

- 专为蒸汽浴室打造的多功能淋浴花洒。FeelGood 淋浴花洒可以和 Effegibi 品牌任何一款蒸汽发生器搭配使用。

- 触碰式控制面板，配置背光图标，以控制所有功能的使用（淋浴、蒸汽、灯光）。

- 淋浴花洒有 3 种出水方式：雨水效果，瀑布效果以及迷雾效果。

- FeelGood 淋浴花洒适用于定制的空间，安装方便。

OMNIATEAM TOUCH

→ 270

用 Omniasteam Touch 蒸汽门将您的淋浴空间补充完整：安装在底框内的门柱，内置功能完善的蒸汽发生器，让您在家就可以打造一个属于自己的蒸汽角落。

特点

- Omniasteam Touch 蒸汽发生器将设计、科技、简易安装集于一体，适合不同需求。

- 提供两种款式：门及蒸汽柱（88x198 cm），或门、蒸汽柱及固定玻璃板（145x198 cm）。
 - 带背光图标的触碰式控制面板，控制所有的功能。
 - 暖浴功能：带预热功能的热风推送系统。
 - 强力蒸汽功能：利用送风系统，减小温度分层，使浴室内的温度均匀分布。

STEAMBOX → 274
蒸汽箱

Steambox 蒸汽箱的设计充满着天赋性的创造，实现了结构墙体的快速安装及与外部的完美隔离，可以保证内部的最佳温度和蒸汽质量。整套蒸汽箱包含不同厚度的聚苯乙烯保温板（5cm和10cm厚度），其上附有织网并用水泥封层，配置带铺设好排水管道的浴室地面，以及具有倾斜角度的浴室屋顶。整套包装内包括箱体粘接及防水操作的必备材料。蒸汽箱的表面还可以用客户选定的瓷砖或马萨克进行装饰，有多种组合方式，也可以选择不同款式的蒸汽发生器，以及专门研发的Spazio无框门板进行组合。

ESS → 278
Effegibi声音系统

将Effegibi的音响装置与平板或智能手机连接，就可以在土耳其浴室内或指定环境里，聆听自己喜爱的音乐。通过预置在结构内的扬声器，可以在土耳其浴室内欣赏音乐。此音响系统配置两个音箱，可以和浴室内的扬声器自行匹配，无需安装软件或进行特殊连接。

ECC → 279
OTHER ACCESSORIES → 296
Effegibi 舒适控制系统

Effegibi 的每一款蒸汽发生器都配置了这个系统，只需在平板或智能手机上下载 Effegibi 应用软件，就可以远程控制管理自己的土耳其浴室。在家中其他地方，可以通过设置开启时间、温度、喜好的灯光，设定自己最舒适的模式。另外，如果土耳其浴室内覆盖无线 wifi 信号，就可以在任何位置进行远程设置（办公室里、汽车里，等等）。最后，Effegibi 的应用软件，还可以提供给用户更多的产品使用信息：从如何更好的使用土耳其浴，到土耳其浴的功效，以及介绍土耳其浴的历史及洗浴仪式。

AROMATHERAPY → 301
香氛

Effegibi 所有产品都预先设计了香氛散播装置，以完善桑拿浴和土耳其浴的魔幻的气氛。

DOORS AND GLASS PANELS → 282
专用门和玻璃

Effegibi 特殊研发的蒸汽浴专用门，可以完美地避免蒸汽外溢，同时保证适量空气的正常循环。不锈钢材质边框以及8mm厚度的钢化玻璃，不仅经久耐用，更与各种装饰风格百搭。使用 Effegibi 研发的专业蒸汽门，还可以将家用淋浴空间，通过简单改造，升级成完美的土耳其浴空间。

SEATING AND SPRINGS → 291
座椅 - 水池

土耳其浴室及淋浴空间内部专用的装饰配件，使用易于清洁的材料制造，在充满水汽的环境下依然耐用。
